Vic Bristow raises the Heart Campaign flag Friday to kick off heart month, February.

Heart fund

Campaign underway

Vie Bristow is hoping Actorians show the vicinity of \$4,500. they have a heart this month.

Mr. Bristow kicked off the February Canadian Heart Fund campaign in Acton by raising the flag at the cenotoph Friday afternoon.

The Acton campaign chairman said kits went out Saturday and about 90 canvassers will be going door to door this month. Mr. Bristow will also canvass local businesses and industry.

Last year the Heart Fund campaign in Acton raised around \$4,200 and Mr. Bristow says he's aiming to increase the amount raised this year by \$300, to tact Mr. Bristow.

Besides the canvassing, about 20 stores in Acton will be offering roses for

Mr. Bristow says he still needs some volunteer canvassers and anyone wishing to help with the campaign can contact him at 853-2237.

On February 26 the Friends-In-Deed group will be hosting a public meeting with films and guest speakers dealing with heart disease. The program will take place at M.Z. Bennett school. Anyone wishing to make memorial donations to the heart fund should con-

to the dedication.

Acton man's firm can't export....

(Continued from page 1)

in Canada) for export to Cuba. The 800 pound machine, a sale for Vector Holdings of just under \$8,000, isn't used for production, Smith pointed out. He added an electrical discharge production machine would cost more than \$50,000 and the machine he bought from a firm south of Chicago would be for school training only.

Vector Holdings ordered the machine, paying in advance, including freight costs, and when it arrived six months later the firm applied through a broker, to Industry, Trade and Commerce, for an export permit.

Smith said, after six weeks, word came back from Ottawa that the export permit had been denied.

. He says, he spoke to an official of Industry, Trade and Commerce (Smith withheld the official's name) and was informed "Verbally" that the permit had been denied because "Washington refused to allow Industry, Trade and Commerce permission to give us an export permit."

Smith notes his uncle and president of the firm, Frank Smith, also contacted the federal government and got the same story.

His company can't export the educational machine to Cuba because it was American made and Washington doesn't have normal relations with Cuba.

"The United States clamps down and a poor little Canadian firm is the victlm," Smith observed unhappily.

The machine will be extremely hard to sell in Canada, Smith says, and even if it can be, it will be costly making calls and sending letters to possible buyers. All this should eat up Vector Holdings' "marginal profit" on the deal, Smith stated. If it can't be sold in Canada, the company can either keep it in inventory, paying high interest rates on the crated machine every day, or send it back to America and lose up to \$1,000 in freight and a possible 10 to 15 per cent restocking charge, Smith explained. And all that is above and beyond the loss of an \$8,000 sale. In addition the loss is "real money" not on paper, he said.

"There is supposed to be free enterprise in Canada. I could understand this If we (Canada) had poor relations with Cuba. But we are on good terms with Cuba. It bothers me that the United States government can tell the Canadian government what it can and can't do," Smith declared.

He is quick to point out he has a lot of respect for both the American people and their government. Further he believes the 'Yanks' are getting a "raw deal" around the world and he doesn't blame the United States for his firm's dilemma.

But he does blame the Canadian federal government.

"This is a reflection on our government," he stated, adding "no matter which party is the government." It is interesting to note his firm's problem transcends both the Liberal and Progressive Conservative regimes.

He'd really like to know who is running the Canadian government, Canadians or Washington?

"All the politicians are the same, The Conservatives, Liberals and the NDP. The country is going down the tube. It is ridiculous, they won't get down to business. They all say they care about small business, but don't do anything," Smith declared.

He admits sometimes he and his family wonder why they keep going in a business where they deal with governments and educational institutes because "they hold all the aces." Fortunately, he says, they don't deal directly with foreign countries, "There are too many horror stories" for small business, it's too easy to lose money dealing with third world nations.

At any time there are four to six people working for Vector Holdings so it definitely is a small business, what Smith calls "the backbone of our country. We pay a lot of taxes," but he

wonders if anyone cares. The company started back in 1958 and initially sold used machinery but then switched to wholesale and distribution in the late 60s.
