

spring & summer...

BOATING

The North is famous for beautiful, clean lakes and rivers. And no place in Canada is more perfect for enjoying all types of boating. Sail boats dot almost every lake during the summer, and quiet, peaceful canoes wend their way up and down every river and lake. Most lakes are deep enough for even the most sophisticated type of motorboat, and water skiers can utilize all the open space they need or desire. Many beautiful islands lend a note of adventure for the boater who desires to stop and have a picnic or fish fry, and the peace and beauty of a Northern sunset over the water usually signifies the end of a perfect day.

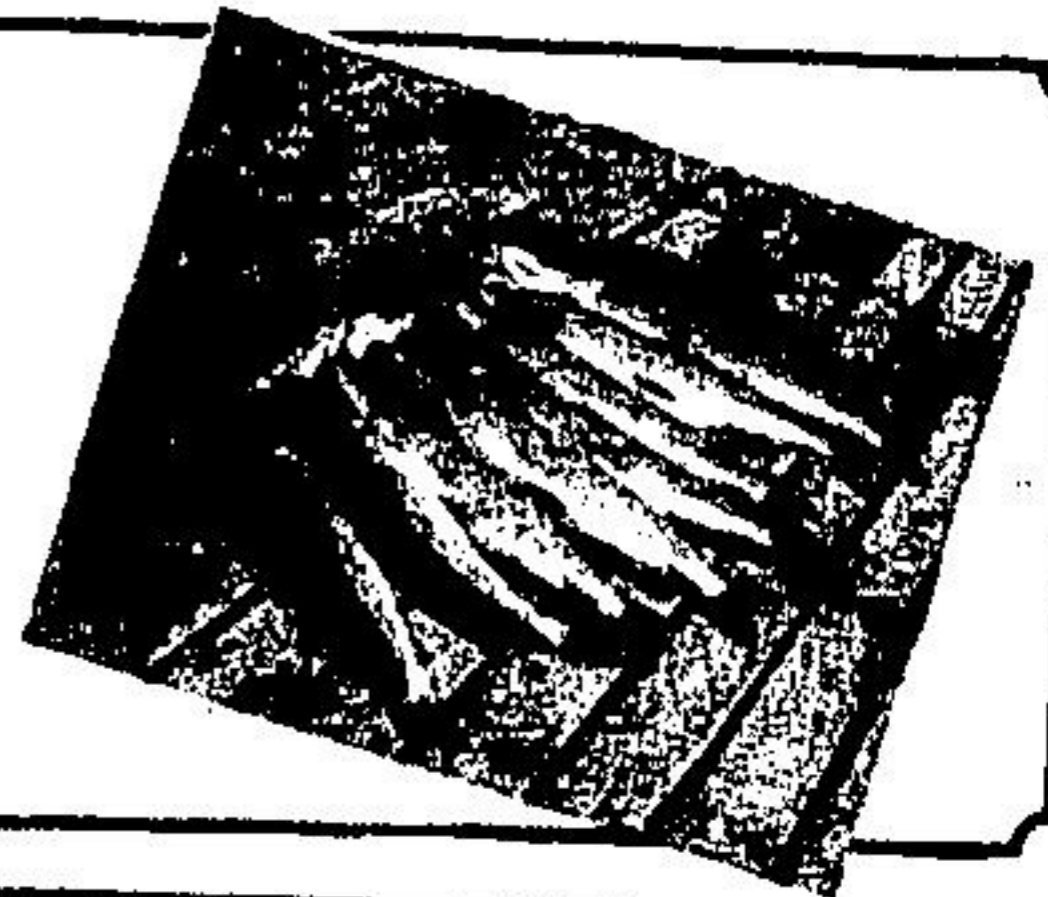

BEACHES

Whether you desire sun and solitude or sun and society, you can find the type of beach you have in mind. Miles and miles of warm sand frame thousands of lakes in Northern Ontario, often in out-of-the-way bays and coves, where you can stretch out in complete privacy and just relax. Or take the family to any community park facility in nearly any town in the north, where you will find concessions, picnic tables, barbecue pits, boat ramps, sand, swimming, and of course, the famous Northern Hospitality! This Northern Hospitality will serve you well, if you wish a more rugged atmosphere in which to do your sunning, for anyone you ask will be only too glad to direct you to this type of shoreline.

FISHING

You can trust any fish story you hear while visiting in the North! For it is likely true. This is probably one of the biggest attractions offered in this area. An avid fisherman can really catch those big 'uns in any one of the lakes and rivers in Northern Ontario. Pickerel, bass, lake trout, giant pike; even the elusive muskie, are plentiful — they are there, and the visitor or vacationer will surely find a trophy fish on the end of the line almost every time! For more out-of-the-way fishing spots, guides can be found in almost every town, and there are excellent fly-in services, too. Many lodges and camps dot the north, and each and every one can show trophies which back up the "fish tales".

HIKING, BIKING & TENNIS

For the city dweller, the wide open spaces found in the northern portion of the province are a magnetic challenge...especially for the vacationer who wishes to include hiking, biking or tennis in his all-too-brief stay. Miles and miles of hiking trails cover the entire region — some easy ones, some more difficult, and some really challenging facilities. Rock hounds, climbers or just strollers, can find just what they want. Biking is popular in most areas, and many very fine tennis courts are available in almost every city and town. The enthusiastic golfer, too, will find many excellent 18-hole golf courses just waiting for the tee-off! Whatever your favourite sport...you'll find it in the North!
