

ELLIOT LAKE

Fish where the big ones are—Elliot Lake & area.

Elliot Lake is like a breath of fresh air to the weary traveller.

The first encounter with the town is the nuclear symbol erected at its entrance—a symbol of energy, whose future benefits to mankind are only limited by imagination. A symbol of a new and better tomorrow.

The next impression of Elliot Lake is a pleasant one, also. The friendliness and courtesy of the people give a visitor a real "boost", and perhaps remind one just how "young" this town really is! For the pioneers who carved this town from the wilderness came in the 1950's and that's why everything in Elliot Lake looks new and fresh...every building or structure was built after 1955!

A vacation here will be a revelation, and the town offers everything you could desire to make this year's vacation the very best ever—especially the Uranium Festival—don't miss anything in bright, clean, exciting Elliot Lake!

HUNTING...

SATISFYING IN THE NORTH!

Year after year, the happy hunter 'bags a big one' when he hunts in Northern Ontario. Not too many people come home empty-handed!

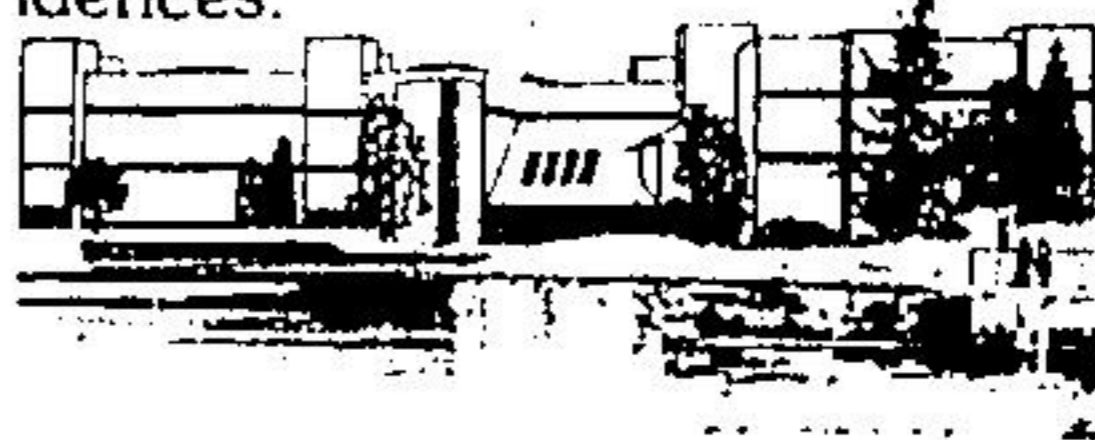

Deciding Today For Your Tomorrow

Young people today are faced with many opportunities and many decisions. You could travel, go to work, or attend university. Whatever your decision, be aware of just how important it is. Today's decision could pattern your entire life. And, when you consider university, consider this...

Nipissing University College has many opportunities for bright, inquiring students. Challenging university programs are offered in

Arts, Commerce, Education, Environmental Geography, Science and Social Work. Our small classes encourage students to actively participate. The beautiful 720 acre campus offers nature trails, a small lake, ski trails and unique townhouse residences.

Nipissing University College...for today and tomorrow.
