

# Site F: Is it environmental or political?

(Continued from B6)

Craig Reid, 25 years a breeder of champion Holstein cattle, said, "this is number one prime agricultural land... and in all my experience there has never been a case of land fill being returned to agriculture." The Region has stated the site would be covered over with five feet of fill and used again for agriculture.

happen.

Bob Johnson who lives on Indian Creek which runs beside the dump site says there will be leachate getting into the creek. He cited the situation in Georgetown where the landfill site was filled and covered over March 31, 1980. Now the Credit Valley Conservation Authority is investigating reports of "black ooze" escaping into the Credit River. In fact Halton Regional Council made \$78,000 available Oct. 7, 1980 to improve leachate control even though the covering contract was supposed to have solved this. The Region states a layer of "impervious" clay will be used to help leachate at Site F. It states the percolation of water will take eight to 10 years.

Tremaine Rd., moved

with his family to the area 15 years ago to "escape the hustle and bustle of Oakville." Now he has been told there will be a truck pass his home once every minute with Site F.

what Solicitor and Acting

Chief Administrative Officer Dennis Perlin terms a "no win situation", there are two new wrinkles in the whole tangled situation. When the Halton site selection committee was looking around for possible locations, they noted National Sewer Pipe Limited had an extraction pit located between the old Burlington dump site and the current Burlington landfill site.

F," he said.

The meeting ran from high to high. Mr. Christensen said the land could handle up to three million tons of garbage, more if it is compacted. He said the site could thus be used for 10 to 15 years. And best of all the leachate pipe and current closed and current dumps ran right in front of National Sewer Pipe property and a pipe from Site A could just be "added on."

so close to being "ideal"

that it would only be right for the Minister to allow this to happen. It didn't and Dr. Parrott said so in a letter to the Town of Milton and to Halton Regional Council. In essence, he said, the EPA legislation deals with one specific site and therefore, it would not be fair of him to change the rules the ball game was being played under.

Strong stuff, but when

the solid waste committee budget was completely cut except for \$120,000 for the source separation program, those against Site F renewed the fight. And it should be noted the \$120,000 was almost dropped again in September of this year when the Region ran into a "surprise" \$700,000 deficit and they needed money from anywhere to make it good. The money wasn't touched then, but it has since been revealed the sewer surcharge system may result in at least a \$500,000 deficit by the end of the year, and more probably an astronomical \$3 million by 1983 according to Price Waterhouse in a sewer surcharge report.

connection, has refused

to enact the bylaw or even consider it in open council. As late as Sept. 6, 1980 Solicitor-CAO Dennis Perlin wrote to Roy Main, Milton Clerk-Correlator, warning him of the consequences of not passing the necessary bylaws.

associated with the EAA

as opposed to the point-on-the-map regulations of the EPA. So armed Fred Leitch representing Milton and J. Edgar Sexton, representing the Regional Municipality of Halton met Sept. 30 before Mr. Justice James Southey to argue whether the Oct. 15 hearing would be under the EPA or the EAA.

so close to being "ideal" that it would only be right for the Minister to allow this to happen. It didn't and Dr. Parrott said so in a letter to the Town of Milton and to Halton Regional Council. In essence, he said, the EPA legislation deals with one specific site and therefore, it would not be fair of him to change the rules the ball game was being played under.

The change of heart by National Sewer Pipe was not based on wanting to be charitable but on pure economics. The company makes sewer pipes of clay but the switch to rubber and plastic pipes is taking over. By accepting some three million tons of garbage at the \$9 Halton Region tipping fee, Mr. New et al could count on at least \$27 million coming in over the next 15 years.

Halton Region authorized noted hydrogeologist Dr. John Cherry to start a study and even allowed for an over-sized leachate pipe to go in just in case. To Milton, and all those opposed to Site F, the feeling was summed up by Mr. Gordon who stated Oct. 3, 1979. "I say we won't have Site F."

"The hearing on Site F has now been put off until November and we're going to have a long hearing after that. "In the meantime, if all runs tickety-boo, I think we could have Site A approved next year... I mean 1980," he said.

It has been one year since those statements and still the hydrogeological report is not completed and Mayor Gordon is claiming a Regional stalling tactic. But it's not for want of trying. On March 13 of this year Regional Councillors found themselves embroiled over a petition to Environment Minister Parrott that any Environmental Assessment Hearing must consider what is most environmentally sound for the Region. Although it has not yet been the policy of the EAB to consider more than one site at a time, Milton Council stated Site F was

opposed by every other group, agency, and municipality north of the Queen Elizabeth Way. Instead of it being the final act in legitimizing Site F, it has opened the gate to what may well be an environmental decision which will set a precedent not just in Ontario, but for all of Canada.

And once again that precedent will wind up squarely on the desk of Dr. Parrott. The Town of Milton, deciding not to be the good, little member municipality of Halton Region and dutifully pass a zoning bylaw in order to make the proper legal

decision. The hearing on Site F has now been put off until November and we're going to have a long hearing after that. "In the meantime, if all runs tickety-boo, I think we could have Site A approved next year... I mean 1980," he said.

**ATTENTION:**  
**Mayors, Fire Chiefs, Police Chiefs, Medical Officers of Health, Municipal Emergency Planners.**  
Register now to attend a conference entitled **Emergency Preparedness for the Eighties**. This important conference will deal with practical issues facing all those involved in emergency planning in government and industry.  
Issues to be covered include the nature of emergencies and the capabilities of response; the role of the local emergency planner and the responsibility of elected officials.  
The Mississauga train derailment will be used as an example of the sort of emergency for which you must be prepared.  
**Emergency Preparedness for the Eighties. November 16-19, 1980, at the Harbour Castle Hilton, Toronto.**  
To register, phone (416) 961-6505. Telex 06-986766. Ask for Emergency Conference Secretariat. Address is: Emergency Conference, Conference Secretariat, 112 St. Clair Ave. West, Suite 303, Toronto, Ontario M4V 2Y3.  
Please note - the date for this Conference is November 16-19, 1980 at the Harbour Castle Hilton, Toronto, not October as printed in last week's advertisement.  
Sponsored by the Ontario Government and the Association of Municipalities of Ontario.
