

**General Electric
Electro Mulch Mower**

Electro Mulch is the mower that takes care of its own clippings. Mulched grass particles naturally recycle their nitrogen and other organic nutrients into the soil within 14 days. Mulching slows evaporation of soil moisture without adding to

"thatch" build-up and results in a generally greener, healthier lawn. The shape and depth of its durable steel deck creates the strong air flow required to distribute grass clipping across the 18" cutting path. Electro Mulch means no bagging, no raking and no clean-ups - it also means less watering and less money spent for fertilizer.

Electro Mulch's 10H.P. motor delivers consistent peak power. The mower offers light-weight handling and quiet operation. It has a 5-position adjustable cutting height and swing-over handle for two-way cutting. Inset wheels allow extra close cutting on both sides as there is no discharge chute. A fully folding handle allows complete
