**If rust is a problem,
Tremclad is a solution**

Tremclad Rust Paint

It's Canada number one rust paint. Tremco TREMCLAD seals against moisture and inhibits rust on clean metal. In many instances, Tremclad can eliminate heavy scraping sanding or the need for priming. Just wire-brush off loose rust and paint right over firm rust.

COLOURS AVAILABLE: Fire Red, Green, Brown, Flat Black, Gloss Black, Gloss White and Aluminum.

other less-than-charming conditions that nature can throw at it.

Preservation without PCP. Transcolor's new formula contains only carefully controlled chemicals. No Pentachlorophenol (PCP). Where ordinary stains are ineffective, Transcolor protects wood from the inside out.

Penetration
The superb preservatives in Cuprinol soak in deep. And that means deep trouble for rot fungi, and other forms of wood destroyers.

Available in a select range of exciting colors.

Transcolor comes in a select range of exciting, trend-setting colors. Its finely ground coloring pigments intensify the grain patterns and enrich the wood's natural characteristics.

A study in extremes

From the blistering heat of the Middle East to the bitter cold of Iceland and Canada, Cuprinol is the world's most widely used line of wood treatment products.
