RIVER

Renee will pour the premixed slip into a mold, and let it set for ten minutes. After this time she pours out the excess slip, and lets the mold sit for a couple of hours, with what's left in it forming the product. Various pieces take different

times, Renee notes, but the average is two hours. After the time is up. the mold is taken apart and the item, now formed, is trimmed of its excess with a knife. A lot of breakage can happen here, Renee says, so care must be taken.

At this stage; it is called greenware, which much attention to the gocan be purchased in any ings on, but her turn will ceramic store, a cost much greater than if poured (However, the initial cost of the molds makes it unreasonable for anyone but the most dedicated.)

The greenware is then left to dry. When if first leaves the molds it is a dark grey color. But when it is fully dry, To work from scratch, ready to be cleaned, it is

Mary Watson cleans a piece of greenware before painting.

light grey-all the ing is necessary. moisture is gone. Each piece must be carefully cleaned before doing anything else. Seams are unavoidable in each item, and these

taken out at this stage also. Once the cleaning is finished, there are two

## <u>l'm a believer</u> You bet I am. My parents said that if I was silly enough to want to go and get sun-burned at Fort Lauderdale this year, I'd have to pay my own way. I did, with a part-time job that I found in the classifieds. I even bought some fantastic, soft-side luggage for the trip at a garage sale I saw in the classifieds. Next time you want something, Checkout the paper. You can find everything in the classifieds . . . they'll make a believer out of you. The Acton Free Press
