4-H news

HORSE CLUB
by Annette Ambe
The Halton 4-H Horse Club held a barbecue and swim for members and family at Glenna Scott's residence in July with fun and lots to eat. Members also went to the Ontario Veterinary College in Guelph. The same month touring the barn and advised on some of the problems the horses had. Also toured were areas such as pathology, surgery, and the post-mortem area.

The August meeting was held at Five Hills Farm where Mr. Hill gave a demonstration on trimming and shoeing a horse. His son Steve took over and completed the demonstration. Members did a quiz and had their special projects judged.

SWINE CLUB
by Neil Gillies
In July, the Halton 4-H Swine Club held its fourth meeting at the Akrell Research Center. Before entering, members had to take a shower and change into the Akrell Center's clothing. They went on to look at the swine and employee Tom Parker gave a guided tour of all the facilities. After the tour members had another shower and changed back into street clothing.

JUNIOR DAIRY CALF CLUB
by Sandra Egger
The fourth meeting of the Halton 4-H Junior Dairy Calf Club was held at Mr. and Mrs. Bill Landlaw's farm in July. Frances Chisholm opened the meeting and turned the meeting over to Jeff Nurse and Ken McNabb. Members judged two classes of Holstein cows. Ken McNabb gave a lesson on Calf Housing.

Meanderings
By Mabel Barkman

I have been calling them raspberry beetles—those creatures small, shiny and black with four white spots that you find in all the ripe raspberries.

Other people call them beer bugs or yeast bugs. They are so pesky that when you bake bread they arrive on the screen in droves and some wiggle right through the screen. If you have a picnic or barbecue, they land in the drinks, the bread or anything that is handy.

Fortunately, they don't bite. They are just one big nuisance and they disappear as fast as they arrive.

I phoned the University of Guelph to find out their real name and was startled to hear they are called sap beetles. I am being sent some literature on the little critters and if a heavy spraying program is indicated, I'm afraid I'll be letting them come and go as they please.

I just can't zap a sap!
