

New Bell cables improve long distance services

Bell Canada hopes to introduce some long distance new services to customers living in the Acton 853 exchange next month as work on laying of fibre optic cable in Acton, Rockwood, and along Highway 7 between Acton and Georgetown nears completion.

Bill Salmon, manager of the Guelph Bell office which takes care of the Acton area explained the engineering for this mammoth project of putting in fibre optics from Guelph to Brampton began more than a year ago and residents will have noticed work being done on Church St. in Acton and along highway 7 east of Acton this fall. The project is costing in the neighborhood of \$500,000.

The installation of fibre optics will provide the circuitry for the TOPS operation (TOPS stands for Traffic Operation Position System). This TOPS Operation will allow people with the 853 exchange to make direct dial overseas calls as well as direct dial

Bell works along Highway 7 at Silver Wood, completed. Salmon added. As part of this project a small building has been constructed in the Silvercreek area, and Salmon said this is a repeater station which is used on all toll lines to boost signals. Bell expects most work to be done by the end of the year and the entire system to be in place by the end of March, 1983.

The Knight for the hearth for your existing fireplace

The glass front is set in a large heavy cast frame assembly with an easy drop out feature designed for periodic cleaning. The glass is protected with permanent log guards to allow for burning full loads of wood. Decorative brass trim frames the glass for added beauty.

The Knight comes in midnight brown with antique brass trim and flashings. The flashing is engineered for easy installation and removal for cleaning.

Adjustable primary and secondary air controls allow a fine tuned burn. This unique mechanical design allows secondary ignition to occur in a separate combustion chamber ultimately achieving a well balanced and extended burn.
