propane

DON'T LET YOUR WEEKENDS GO UP IN SMOKE!

Propane is a wonderfully convenient fuel for cottagers, campers and backyard barbecuers. It's clean, quick and efficient for cooking, refrigeration and lighting. But, like all flammable materials, propane must be used with care. Did you know, for instance, that:

- Propane barbecues should never be used in an enclosed area.
- Propane cylinders must be stored outdoors and checked for safety every 10 years.
- A propane cylinder should always be moved or stored in an upright position.
- Propane cylinders must be located outside recreational vehicles or in a compartment that is gas-tight to the vehicle interior and ventilated directly to the outdoors.
- It is strongly recommended that propane-fuelled refrigerators be cleaned and adjusted every year.

You'll find these safety facts and more in our free booklet. Mail the coupon today and get your copy. It's a great reference guide, and it will ensure that propane is always a helpmate rather than a hazard to you and your family.
