

Provincial President is Women's Council Visitor

Georgetown Local Council of Women were delighted to have as their guest speaker the provincial president, Mrs. G. B. Armstrong, at the May meeting held at the residence of Mrs. F. Nodwell on the 22nd.

With the singing of God Save the Queen in honour of Victoria Day, Mrs. Sutherland opened the meeting and welcomed visitors.

KEY WORD

The business period included the Canadian Association of Consumers Report which stressed pollution as being the 'key word' for the 70's, presented by Mrs. Dick, Economics convenor. Mrs. J. Nieuwhof men-

tioned 'Farm Safety Week' in her report on safety. Mrs. Ann Gray gave the Red Cross report regarding the next blood donor clinic, June 8, and Mrs. R. Jones read the annual IODE report.

Mrs. G. B. Armstrong was welcomed and introduced by Mrs. Sutherland.

FIRM STAND

The president based her remarks on her report to the provincial convention in Hamilton. Such topics as the recent study on poverty, the question of the legalizing of marijuana, abuse of drugs, the appointment of an Ombudsman at the provincial level and the tragedy of

the 'battered baby' complex were a few of the matters which Mrs. Armstrong brought to the attention of the members.

She also mentioned that council intends to take a firm stand on the issue of Sunday observance. Her knowledge of the work of council and her charm in presentation greatly endeared her to the Georgetown members.

FLOWER PIN

Mrs. Sutherland thanked the speaker and presented her with a Georgetown handcrafted leather flower pin.

Tea hostesses were Mrs. A. Pritchard and Mrs. E. Buck.

Local Council of Women president Mrs. Dora Sutherland, left, and immediate past president Mrs. Anne Pritchard chat with provincial LCW president Mrs. G. B. Armstrong, during her visit.

Two Already, Teacher Now Aiming for Third Degree

To most people, one university degree represents the ultimate challenge in education. But Richard Perrott, at 54 years of age, has begun working on his third one.

A 1970 graduate of Brock University and former graduate of the University of British Columbia Mr. Perrott is now looking forward to completing his master's degree in education from the Ontario Institute for Studies in Education. (OISE).

Attaining a bachelor of arts degree at Brock didn't come easily for the Georgetown elementary school principal.

For three successive years he travelled about 300 miles weekly in order to obtain his BA. Mr. Perrott made the 72 mile trip to St. Cath-

arines two evenings a week. "I wanted to do it because it represented a challenge," he calmly explained.

Mr. Perrott began his challenge at Brock four years ago while teaching there at St. Peter's School. A year later, he accepted the position of principal at Holy Cross School in Georgetown, but continued his education at Brock — supplementing it with a few subjects from Waterloo-Lutheran University.

His BA degree includes a major in geography. He also holds a bachelor of education degree which he obtained from UBC in 1955.

A native of England, Mr. Perrott's university experi-

ences began in 1938 at the University of London. However, he was unable to complete his initial challenge due to a slight 6 1/2 year interruption in the British Armed Forces.

In 22 years of teaching, the Georgetown principal has served in various schools from the Canadian prairies to an unseeded Indian reservation, Wikwemikong in Northern Ontario. He describes the Indians as being a "delightful" people even though they are "much maligned."

Besides having already successfully accepted two challenges, Mr. Perrott and his wife, Marguerite, have also raised three bright children between 14 and 24 years of age — which, in itself, is quite a challenge.

CLINIC HERE MONDAY

POINTS URGENT NEED FOR BLOOD DONORS

"Are blood donors really needed as urgently as the clinics claim?" We often hear that question these days, especially when there's a blood drive in our own neighbourhoods. The answer to it is an emphatic YES.

Let's find out why. First of all, a donor can give only one unit every three months. That's for medical reasons. (A unit consists of about one pint). On the other hand, most patients needing transfusions receive more than one unit. In an exceptional case as many as 25 units of blood might be administered. One Ontario hospital reports that the average operation in which blood is transfused requires 5 1/2 units.

Another thing is that for simple reasons of age, no one under 17 or over 65 may give blood. And many of those of the right age are prevented from doing so by one health problem or another. The obvious point here is that, whereas everyone is in a position to receive blood, by no means everybody can give it.

LIMITED TIME ... A third factor is that whole blood can be kept only a limited time after collection. At the end of three weeks the red cells become too fragile for use, and the plasma has to be separated from the whole blood. After this the plasma is broken down into fractions, some of which can be stored away safely for months or years. These fractions have special value in the prevention and treatment of certain diseases, as we shall see.

Unfortunately, it is the Red Cells, not the plasma fractions, which are of vital importance in the one field in which blood transfusions are most commonly used — haemorrhaging. As a result, donors are in heavy demand all year round.

Nevertheless, blood does have many therapeutic uses besides the treatment of haemorrhaging, and advances in the world of science are increasing this number every year. Here is yet another reason for the never ending demand for donors. The Canadian Red Cross Blood Transfusion Service is one of the most progressive in the world and is employing some of the latest techniques to separate valuable blood components.

LIMEHOUSE Mrs. Shelbourne, 97 Dies at Halton Manor

We extend sympathy to the wife, daughter and relatives of Mr. Fred Anthony who passed away Saturday following a long illness. ...

The Scouts and Cubs auxiliary held a very successful bake sale and afternoon tea on Saturday, realizing over \$68.

We hope for a complete recovery for Mr. Bob Lindsay who is receiving treatment, following a recent operation in Brampton. ...

Rev. F. N. Young held a special meeting on Sunday with young people wishing to join the church for their first communion on June 14.

MEDICAL USES

Let's have a closer look at some of the medical uses of these components.

Platelets, for example, are minute cells. Today they can be isolated and used as an effective treatment for leukemia.

Anti-Haemophilic globulin is a blood product that can now be separated by a new technique. It is of vital importance in the treatment of haemophilia, a hereditary disease which causes uncontrollable bleeding. Rh immune Globulin is injected for the prevention of haemolytic disease of the newborn. Gamma Globulin is a plasma fraction used as a protection against measles and jaundice.

A number of us lost a dear old friend who lived here for a number of years, when Mrs. Fred Shelbourne passed away at Centennial Manor last week in her ninety-seventh year. — Mrs. A. Benton

Packed Red Cells are very effective in the treatment of severe anaemia.

Serum Albumin is invaluable in the treatment of shock resulting from extensive burning.

And so the list goes on. The thing is that all these different uses have made blood donations more valuable than ever before. It means, also that one unit can be put to several uses. So be a blood donor, on Monday, June 8.

CLEM W. COLLINS

The new President of the Christian Science Church for the coming year is Clem W. Collins, a native of Denver and former resident of Los Altos, California. Mr. Collins has served The First Church of Christ, Scientist, in Boston, since 1963 as Publisher's Agent, Trustees under the Will of Mary Baker Eddy, responsible for publishing the writings of the Discoverer and Founder of Christian Science. A Christian Science practitioner, he has served the church organization in many capacities, including First Reader and Christian Science Minister for the Armed Services.

Newfoundland Native Was Longtime Dosco Employee

A Newfoundland native and Georgetown resident since 1968, William J. Stone, 65, died in Georgetown hospital on May 10.

Born in Bell Island, he was the son of William P. Stone and Frances Donahue. He was employed for fifty years with Dosco Wabana Mines there, and after coming to Georgetown was on the staff of the Dominion Seed House.

He was a member of Holy Cross Roman Catholic Church and the Knights of Columbus. He leaves his wife Georgina Steele; nine children, John, Harry, Bill, Angus, Eric, Dan and Margaret of Georgetown, Mrs. Theresa Lundrigan St. John's Newfoundland and Jim Labrador City, Labrador; seventeen grandchildren; a sister Mrs. Elizabeth Norris, Galt and brothers George in California, Eric of Galt, John, New York, and Fred, Montreal.

Requiem mass was conducted by Father Gerald Craig in Holy Cross Church on May 22. His sons Harry, Bill, Angus, Jim, Eric and Dan were pallbearers. Mrs. Elinor Clarke was organist and Mrs. Ann Burke soloist. Interment was in Greenwood Cemetery.
