### "FILL IT" ESQUESING TELLS RIVIERA OWNER

Admittedly he was not on township property, Ed Zuber, Riviera owner, told council Monday he would do whatever they said immediately. "If you say get off the hill, I just wanted to improve the appearance of the whole area by installing a fountain, surrounding shallow pond they have at Centro Island."

"The immediate neighbours are not complaining, perhaps the two who don't live nearby feel they are self-appointed guardians of the public lands, or perhaps they like the newspaper headlines," commented the Riviera owner.

"I think the self-appointed guardians of public land is closer to the truth," retorted Julian Reed.

Cr. Wilfrid Leslie suggested the land be staked to show township property, council agreed.

## DREDGED SWAMP

In a lengthy brief to council, Zuber stated that he had dredged away an undesirable swamp when he bought the property, and had cleaned up surrounding township land as well. A large portion of this work is on my own land, and nothing has ever been denied the owner of this land," it continued.

### North Halton OPP Charges Result in 28 Convictions

During the week ending June 13 officers of the Ontario Provincial Police North Halton Detachment worked a total of 9,601 hours and patrolled 9,601 miles on provincial highways, County and township roads under their jurisdiction. A total of 41 charges were laid for a variety of offences under the highway traffic act and 33 other drivers received warnings. Proceedings in provincial court led to 28 convictions being registered.

Officers responded to more than 80 general occurrences this week. Included were: two thefts, 6 complaints of suspicious persons, 2 impaired drivers were apprehended, 1 fraud, 2 assaults, 2 sudden death investigations, 12 investigations under the Liquor Control Act.

## OBJECT TO CLOSING

Producing old maps of the area, Julian Reed stated, "We would surmise this pond is totally on township land, and perhaps some of the trees and the pond as well. The residents are objecting to his using the pond, but we are objecting to closing the road," he added.

He stressed the urgency of the situation saying that children had been playing in the excavation that afternoon.

"The river is only 15 feet deep and is running at 15 miles an hour," E. Zuber broke in.

Julian Reed repeated his request for the refilling of the excavation.

Doug Fishburn read the section of the Criminal Code covering unfenced excavations, and noted they were there to back up council's motion of last week, which stopped the use of any township property, and the return to its former state. "The pond is entirely blocking the road allowance," he contended.

## WANT IT BACK

It was a big swamp when I bought the property, do you not return it to that state," said Emil Zuber.

Charles Burns, the 82 year old walking wonder who carried Georgetown sponsorship for the full 31 miles in the May 2 Miles for Millions marathon is going to receive a foot for his feat. And so is somebody else, although Miles for Millions officials still haven't declared the second recipient.

The trophies, donated by Y. World Service official, Mrs. Merl Diplock, will be given annually to the oldest and youngest completing the Georgetown-Brampton areas Miles for Millions Walk.

While Mr. Burns is a shoe in for the 'oldest' award, the walk committee is still trying to determine who was the youngest to go the distance. At the moment, the most likely candidate is Paul Halley of Brampton who will be seven years old on July 9.

If anyone knows of a young walker who qualifies the person to notify is Mrs. Diplock at 457-1214.

The trophies are in the shape of a foot — naturally.

Two workmen were rushed to hospital from the site of sewer construction on Guelph St. east of John, Wednesday morning after a 14 foot trench they were working in caved in.

Alfio Marcusso suffered shock and a chest injury and Frank Mazzola a possible fractured arm. Both are Toronto men. Marcusso was discharged from hospital and Mazzola was sent to his own doctor in Toronto.

They were installing shoring to prevent a cave-in when the accident happened. Both are employed by Winchester Construction.

The Department of Labour has halted work on that part of the project pending an investigation.

With streets torn up all over town, and detours the order of the day, it should be good news to the traveller to learn that all should be back to normal by August 15.

Tyres Avenue should be finished first, with contractor Jo, Cucci, of Cucci Construction hoping for a July 15 finish.

Delrex Blvd., where the

storm sewers are already in, is having the road base laid now, then the permanent paving will go down. Contractor Armstrong Bros. are figuring on an August 1st completion date.

Maple Avenue, the biggest job of them all, and the one that looked most like a disaster area while the work is in progress, should be all neat and clear by August 15. This is also a Cucci Construction project.

The trunk sewer project, by Winchester Construction should be completed about August 1, while the John St., lift station is not so definite since there has been a delay in delivery of the electrical equipment.

As The Herald approached its press deadline yesterday ... highway traffic was diverted from a section of Guelph Street where the relaying of sanitary sewerage has severed the road.

Traffic between John St. and Durham Street is being routed around the project via McNabb Street. That situation will likely exist until sometime tomorrow.

The license will expire at the end of the year. This last clause was added at the insistence of Cr. Russell Miller who felt a new council should be in control of the situation.
