Having a Natural Gas heating system is like making your own sunshine.

Sunshine. It's warm, pure and charged with energy. Natural Gas too, is all these things. And it's very, very dependable. It's always there, "on tap", just like your water supply. You have to pay for Natural Gas, while sunshine is free, but you'll probably pay less than you will for other sources of heat. Also, a Natural Gas heating system has fewer moving parts, so it requires little or no servicing.

Clean, dependable, economical Natural Gas. As sure and as pure as the sun and an important factor in the control of air pollution. Think about it while you try to imagine a day when the sun won't come up.

United Gas
