PAGE 3

THE CRECHE
The creche is the oldest and most significant symbol of Christmas, first created by St. Francis in the Middle Ages. The creche, a tableau of Mary, Joseph and others around the crib of Jesus in the stable at Bethlehem, is often built for display at Christmas.

IN IRELAND
In Ireland, the man of the house sets a two footed Christmas candle, usually a red one decorated with holy sprigs, in the main window of the house. It is the custom for the youngest child in the family to light the candle. Some households have a candle for each member of the family.

**Don't Hurt Them
..or Will It!**

by Rev. Robert Scrivens, Minister, St. John's United Church

"What they don't know won't hurt them!" is a common enough phrase. Sometimes it is used in rather a jolting manner and no harm will come to the parties involved. Sometimes it is used to accompany an act which is deceitful. It may involve bad apples at the bottom of a basket when all of those on top appear to be of the best quality. It may be a piece of faulty merchandise covered over by a sparkling coat of paint or a padded expense account that will outdo the company. "What they don't know won't hurt them!" ... or will it?

This would be a dangerous phrase to use about an unmarked bottle of poisonous material in the hands of an unsuspecting adult or child. It is not a phrase either that fit the situation when Mrs. James Cross, the wife of the British trade commissioner, sat alone ignorant of her husband's condition. What she didn't know was a very distressing thing for her.

On that night in Bethlehem when God broke into the human condition in the person of the Christ there were hundreds of people in inns and dwellings surrounding the stable and in the countryside about who did not know what was happening so near to them. I believe that what they didn't know DID hurt them! They were so close to knowing that "God so loved the world ..." but oh so far away!

We are slowly realizing that the air we breathe and the water we drink cannot be taken for granted. We didn't know this and it's beginning to hurt us. We had thought that man could live by bread alone and are startled to realize that affluence and technological development will not alone bring inner peace. Our ignorance is hurting us.

It's Christmas, 1970! Will your family know that Christmas is more than coloured lights, trees and Santa Claus ... we enjoy these too! But will you know and will they know that Christmas is about the Lord of Life who lives among us and gives us new life if we surrender and lay aside our selfishness and greed and call Him Lord?

"What they don't know won't hurt them! ... or will it? ... or will it?"

Georgetown Alliance Church

of the CHRISTIAN & MISSIONARY ALLIANCE

DAVID PHILLIPS, Pastor — 877-9816

FRIDAY, DECEMBER 18th

at 7.30 p.m.

ALL WELCOME

Christmas Rewards

The Birth of Christ is celebrated at Christmas. But, in effect it is everybody's birthday, and the celebration going on all over the world. Therefore, Christmas is many things — some real, some only felt.

Christmas is the excited gleam in the eyes of children; it is the happy music (to celebrate a birth) and talking and laughing; it is bright-painted toys and decorated trees. It is the tinkling of bells and the taste of candles. It is the calm fulfillment that follows hectic days of preparation.

There is a feeling of compas-

sion for the less fortunate that glows more warmly on this day than any other day.

Christmas is the time of the heart's inventory, the time of being together and going home.

Most of all, Christmas is the time of transformation of mothers and fathers, grandmothers and grandfathers, into the children they once were — and still are — for a very short time this one day of the year.

Bible Lands Pilgrimage and Athens

When it becomes a question of ultimate precision, Dual has the answer.

MODEL 1215 — \$99.50
All Prices Less Base Cartridge and Cover

MODEL 1219 — \$175

MODEL 1209 — \$79.50

MODEL 1215 — \$129.50

If you're about to buy a turntable, naturally you want precision. The problem is that normally you can't expect to have it. Not unless you're prepared to pay a lot for it. But at Dual for the past 50 years, ultimate precision has helped us build our world wide reputation. It isn't something that's only found in our highest priced models: It's built into every turntable we make.

And one of the ways that we can obtain ultimate precision in all four of our models is with our quality control. Just to give you an example, after every fifth stage of production, we go back and check the other four. Or there's our three separate quality control stages. They check each Dual mechanically, electrically and acoustically. Or our final check where, just prior to shipping, one out of every ten Duals is unpacked all over again.

So you see, with our Dual quality control precision is never a problem. You're assured of getting it in any of our models.

The only problem you may have now is which one is ideal for you.
