

# Georgetown and District Campaign Target \$14,500

Don Kyle, Georgetown branch manager of the Bank of Montreal, is chairman of Georgetown and District campaign.

Don Kyle, the Canadian Cancer Society's campaign chairman for Georgetown and district, estimates that over 120,000 Canadians will be out canvassing for the Cancer Society this month in a massive people attack against cancer.

During April, the Canadian Cancer Society appeals for funds from the general public, principally for cancer research. "Right here in Georgetown," said Mr. Kyle "our team will consist of many volunteers. These people are giving of their free time to battle against cancer. And although they know that many types of cancer can be beaten, they also realize that there is still much work to be done."

**OBJECTIVE**  
He went on to outline the importance of the fund-raising campaign in relation to the work of the Cancer Society. (The national objective for 1972 is \$7,296,225 and the share of this for Georgetown, Acton and district is \$14,500.)

"The money raised this month," he said, "will be used in research, public education and service to patients programs across Canada. We are trying to make the Seven Safeguards against cancer well known to each and every Canadian, and to point out the folly of ignoring any of the precautions that can lead to early detection of cancer."

**TOP PRIORITY**  
He went on to say that researchers are striving day and night to find the key to unlock the mystery of cancer. "On an individual basis," said

Mr. Kyle, "the needs and comforts of the cancer patient have top priority with the Society. Our volunteers are constantly active in our Service to Patients program, not only by ministering to patients' physical and financial needs—but by bringing the gift of cheer and hope."

Mr. Kyle remarked that the work of the Canadian Cancer Society would not be possible without the generous support of the Canadian public.

"When our volunteer canvasser calls, your donation will be helping science to win out against cancer," said Mr. Kyle.

## Limehouse

### Shower For Bride-to-Be

Mrs. Sam Waters opened her home recently for a miscellaneous shower in honour of a spring bride-to-be, Miss Colleen Deforest.

Mr. and Mrs. A. C. Patterson returned from a month's visit to Florida last week. They travelled by car, and visited his brother, Mr. and Mrs. Arthur Patterson and others.

A larger than usual congregation welcomed the newly inducted minister, Rev. Peter Barrow, his wife and family, at the Easter service at Limehouse Presbyterian Church Sunday. The choir sang an appropriate anthem and led in the service.

Mr. and Mrs. Roger Cummings and children visited relatives in Montreal for the Easter holiday.

Mrs. Sam Gishby has returned home from Georgetown hospital and we hope for improvement in her health.

—Mrs. A. W. Benton

The Very pistol was a pistol used in warfare for discharging illuminating rockets or signals.

## Late Snow Unusual

# This Could Be Another "Year Without Spring"

by Roger Smith  
March 1972 was an extension of winter. In this area, as temperatures averaged only 23.9 degrees, about 6 degrees below the 30-year average for the month.

Periods of cold weather alternated with periods of seasonable temperatures. There were no significant intervals of warm weather. Both rainfall and snowfall were above normal, being the greatest precipitation since 1964.

Although sunshine was near average (48 percent of possible sunshine), it was less than in any of the previous five months of March. It was the coldest March since 1960, and 22 days had below-average temperatures.

The month began with a serious freezing-rain storm. 0.53" of rain fell on March 1 in 30 degree temperatures. Damage locally was moderate, but in a swath from Oakville to Kitchener, many trees and hydro wires were brought down. This area was fortunate to escape, since about 0.75" of freezing rain is sufficient to cause such damage as this.

There were several very cold days in the first week of March, and on the 4th, a minimum of -8 was recorded. Following a brief mild spell on the 7th (45 degrees), another cold spell followed, with sunny but crisp weather. The highest temperature March 8-10 was only 23 degrees. The week of March 11-17 was milder, but stormy.

A slow-moving storm dropped .36" of freezing rain and 5.2" of snow on March 13-14. The next few days were sunny, with cold temperatures at first, but on March 20, 48 degrees was recorded, the high for the month.

On the evening of March 21, there was a brief but spectacular display of lightning, with a short period of heavy rain. Light rain continued overnight, with an

accumulation of 0.65". This storm system also dragged its heels through southern Ontario, lasting for almost three days. As it departed, about 3" of snow fell on March 22-23. This was followed by a very cold five-day period (March 23-27), when under mostly clear skies the temperature averaged only 20 degrees, about 14 degrees below average.

As the month closed, temperatures returned to seasonable levels, reaching 48 degrees again on March 29 and 31. The latter date, Good Friday, was perhaps the most pleasant day in a fairly unpleasant month of March.

April began with several rather cool days. On the first, heavy showers of wet snow added another inch to the ground cover. At that time, the area north of Georgetown had a cover of 6-15 inches depending on location (excluding drifts).

## Won't Rebuild Razed Feed Mill

The mill at Master Feeds in Stewarttown which burned down February 29, will not be rebuilt. Instead, a mobile mill which will travel to the individual farms will take its place.

The mobile mill, more convenient for the farmers, will grind the grain and mix the supplement right on the spot. This is the trend in modern farming today.

Manager Harold Gardhouse said the store will be remodelled to add more warehouse space, and the parking lot enlarged on the area where the mill was located.

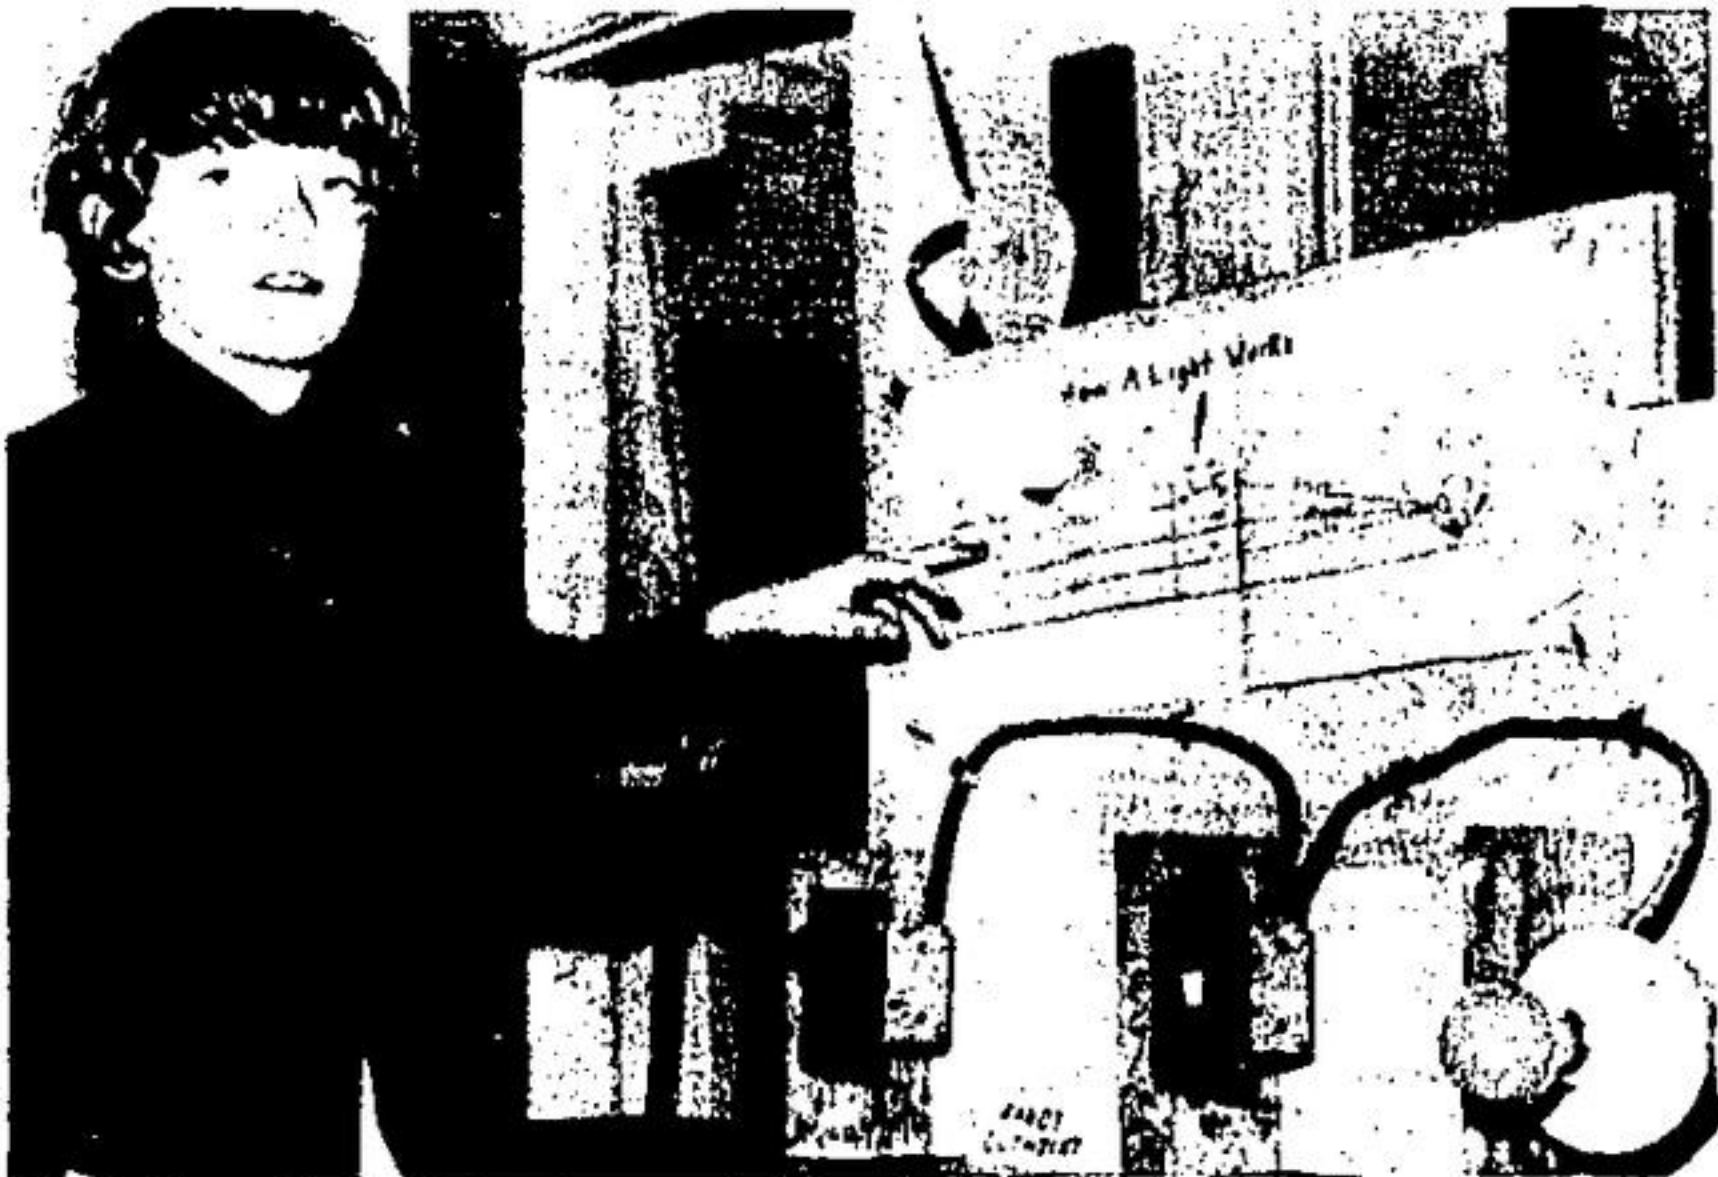

The store has a wide range of supplies, including hardware, saddles, fertilizers, feed, and almost everything else needed by the farmer and gardener.

always hope. This past winter bears a great similarity to 1896, the so-called "year without a spring". In 1896, it was very cool and damp until about April 10, but after April 15, there was six weeks of 70 degree weather or warmer. It was 78 degrees on April 17 and 89 degrees on May 9, after a colder month of March than we had.

# Glen School Children Explore World of Science

A diagram and a working model clearly explains how a Light Works in this display at the Glen Williams public school science fair made by Randy Cuthbert.

Electrolysis is the name of this process being demonstrated by Steven Brandt at a recent science fair at Glen Williams public school.

Planets make their merry-go-round ride around the sun in this display by James Frank at the Glen Williams public school's science fair.

## STEWARTTOWN CAGERS TOPPED LEAGUE

Stewarttown Senior Public School captured the league pennant by finishing first in the North Halton Public School Basketball League this season. In the play-offs they have eliminated Martin Street of Milton and are

matched with Centennial of Georgetown in the finals. In the front row are Allen White, Dean Popiel, Ryan Wilson, Rick Iglesias, Dick Popiel and Robbie Hamilton. Back row, manager Barry

Brown, Paul Allison, Benny Sit, Kevin Weatherall, Jim Morrison, Leslie Clendenning and co-coach Lu Zander. Coach Peter Gardiner is missing from the picture.

## Death Rate Reduced

In the past 25 years the death rate from cancer of the uterus has been cut in half. If all women over the age of 25 had a simple Pap test every two or three years this form of cancer would be practically eliminated. So states the Canadian Cancer Society which needs your contribution to help it to continue its research into more ways to keep us healthy and happy.
