Effluent No Longer A Problem

The effluent problem at Abitibi's Georgetown coating mill has been completely resolved according to a pamphlet published by Abitibi Paper Company Ltd.

"The effluent problem of this fine paper converting mill has been completely resolved," says the pamphlet. "The effluent from this mill is pumped into a cyclator which removes all suspended solid matter that settles out into a sludge form.

"The sludge is then trucked away to a company-owned land dump. The remaining liquid effluent requires a secondary treatment to lower the BOD content to an acceptable level. This is treated in the municipal sewage system. For this service the company pays an annual fee to the municipality."

PRIZE BECOMES PRESENT

His first bank deposit, a jar full of nickels, dimes and quarters, totalling over \$25 won nine year old David Norton, 25 Arletta St., the chaise lounge he is enjoying. All new clients of the Royal Bank, opening an account of \$25 or more during a two week period, had a chance of winning the chaise lounge. David told bank employee Vera Shepherd, sitting with him, that he was giving the chaise lounge to his mother for her birthday. His parents are Mr. and Mrs. Albert Norton.
