## Rural Philosophy Declare War On Lawn Ants

Ants are one of the most interesting and industrious insects. Nonetheless, when they infest your lawn, they create unsightly and troublesome mounds that can be rough on your lawn mower. There are several ways to control ants, says D.B. McNeill, horticultural specialist with the Ontario Ministry of Agriculture and Food.

Chlordane is effective for controlling ants in lawns. The chemical, available in emulsion, wettable powder, and granular forms, should be used according to the manufacturer's directions for ant control.

Spot treatment can be effective in eliminating ant hills for a short time. Apply an 1/4 teaspoon of 40 per cent chlordane wettable powder to each hill and wash it in. One teaspoon of granular chlordane will give similar control.

There was a fair number of people out on Sunday to hear the new minister Rev. Stiles. The sermon on Sunday was based on the theme "Are you fun to live with?" and it was most interesting. The previous Sunday, the topic was "What does your name mean to you?" The subject for Sunday Aug. 26 will be "Have you pr...yed about it?"

We extend sympathy to Mr. and Mrs. Ernest McEnery in the loss of an aunt, Mrs. Cheyne, whose death occurred in Stratford on Tuesday.

Two part German shepherd puppies, of the same litter, abandoned last week on the Sixth Line, of Esqueping, turned out to have a brother, making a total of three reported.

Another Sixth Line resident, Mrs. Nan Creaghan, found the third puppy crying on her doorstep, last Monday night.

Mr. Tom Brotherton and Mrs. John Somers, residents of the same road, temporarily adopted the other two. Puppy love has found a home for two, but Mrs. Somers still has a male pup, she is most anxious to see adopted, since she already has a dog and cat.
