

JOY TO THE WORLD!

We sing out our wish for you — Merry Christmas!

McGibbon Hotel
GEORGETOWN

To our many wonderful customers, we wish the best of holidays. For letting us serve you, our thanks.

SHEA'S GARAGE - NORVAL

Greetings

The ROTARY CLUB of GEORGETOWN says

"THANK YOU"

To all who supported the Club in its work, during the year.

A special word of thanks to all those who helped make the Annual Senior Citizens Dinner a success. Without the many hands involved we could not continue the program we provide yearly.

Every good wish for the New Year.

T. H. BRIGGS
President

Christmas Blessings To All...

ENGAGEMENT

Clark and Ruth Lyons of Norval are pleased to announce the forthcoming marriage of their daughter, Gayle Marie, to Brian John Robinson son of Mr. and Mrs. Norman Robinson, 6 Langwith Court, Brampton. The wedding will take place at 6:30 p.m. on Dec. 28.

Hypothermia Cold Killer

Hypothermia is the number one killer of outdoor recreationists according to the Canadian Society of Safety Engineers. It is a state caused by exposure to cold, wetness and wind for a sufficient period of time to drop the internal body temperature, resulting in extreme exhaustion and eventually collapse and death. It is hard to believe that most cases of hypothermia occur in air temperatures between 30 and 50 degrees Fahrenheit. Wet clothing at these temperatures is particularly dangerous as cold water held against the body disperses body heat faster than it can be generated and energy reserves are rapidly exhausted.

Happy Holidays

Christmas is here and we wish you the very best the season offers — peace and happiness!

SERVICES

The Ontario Safety League has frequently pointed out the advantages of woolen clothing for the outdoorsmen. When wool gets wet it loses less insulating value than any other type of fabric. This helps retain the body heat. It is also helpful to wear water and wind proof outer clothing that protects the entire body, keeping it warm and dry. The base of the skull is most vulnerable to cold as it contains the pineal gland, a vital control centre. Persistent and violent shivering is a reliable warning of approaching hypothermia and should never be disregarded. Immediately set about finding shelter and warmth which will build up the body temperature to a normal state.
