**BEAVER handyman tip**

Planning to panel

Today we start an in-depth series of tips on paneling. Read them all. Paneling comes in standard 4' x 8' sheets. So, to find out how many sheets you need, simply do this: measure each wall and then divide by 4. Then select the BEAVER Paneling you need from this ad. Your BEAVER store also stocks a great selection of mouldings and coloured panel nails.

2. In older homes you'll find some walls may be more than 8' high. This means you'll need extra paneling. To calculate the difference is not difficult. Simply measure the difference in height and divide this into 8' to find out how many pieces can be cut from an 8' panel. Remember, at your BEAVER store you'll find all your paneling needs.
