

GDMHA Weekly Roundup

# "Root Beer and Puck Days" this weekend

By SHIRL RICHMOND  
The GDMHA have proclaimed this coming Friday and Saturday as "A & W Root Beer and Puck Days." In cooperation with the Georgetown A & W, free root beer coupons will be given out with every purchase of a hockey puck for 25 cents. These pucks can be purchased during the Friday night novice and midget leagues and also during the Intermediate Raiders game. All day Saturday - morning, afternoon and evening - we will be promoting the 25 cent puck and free root beer coupons during our league play. This is a fund raising promotion with all proceeds going to minor house league hockey.

Any player who has not yet produced proof of birth is asked to bring his certificate with him this week to be given to his league commissioner. If you do not know your commissioner, ask the help of your coach.

**EQUAL ICE TIME** which is the CORNERSTONE of our house league hockey is spelled out in a definite set of rules that coaches must follow. These rules are split into three categories, 1. Atom; 2. Pee Wee; 3. Novice. The first category covering the Atom League reads as follows:

"All boys, save and except the regular dressed goalie, must change entirely on each shift, no preference should be given to any players at this age when short-handed or with a man advantage. This is based on a five on, five off allotment. If a team is short-handed the player missing his regular shift must see ice time before his regular line goes back on the ice. If more or less than an even change of players exist at game time, the last player must see ice time before the entire first group returns to the ice surface. Boys at this age should be taught to play all positions."

## THE ALL NEW '75 TOYOTA COROLLA. MORE CAR FOR LESS MONEY. PERIOD.

### COMPLETELY RE-DESIGNED FOR 1975.

For 1975, we set out to improve a car that had become one of the three best-selling cars in the world. And to offer more car for less money than our competitors. We did it.

### TOTALLY NEW. TOTALLY BEAUTIFUL. TOTALLY TOUGH.

We've made the 1975 Toyota Corolla more enjoyable to drive. We've made it more impressive to look at. We've made it easier to start and easier to live with in winter.

The 1975 Toyota Corolla is slightly longer than last year's model. It has a longer wheelbase and a wider stance. It has more headroom, more legroom, more shoulder room, more room in the trunk and a larger gas tank.

We added more standard equipment, modified the combustion chamber and changed the compression ratio to get even better performance from Corolla's rally-proven 1200 and 1600cc engines.

And we wrapped it all up in a tough little body that's also the most beautiful Corolla yet.

### UP TO \$422 LESS THAN PINTO.\*

This price difference is based on the manufacturer's suggested list price for the lowest priced Pinto compared with the lowest priced Corolla, at the time of publication. We have 8 Corolla models for you to choose from. And our price includes many standard features which are either optional or simply unavailable on Pinto. Power front disc

brakes, an electric rear window defroster and reclining bucket seats, to name just a few.

### UP TO \$412 LESS THAN VEGA.\*

Again, we are comparing manufacturer's suggested list prices for the lowest priced Vega, and the lowest priced Corolla at the time of publication. And keep in mind, all the equipment that's included in our price which you might have to pay extra for on Vega.

### MORE MILES PER GALLON

Nobody knows exactly how many miles per gallon you'll get from any given car. But this much we do know. Toyota Corolla 1600 just gave 39.6 miles per Imp. gallon in the U.S. government-approved I.P.A. highway tests for 1975.

models. Significantly higher than either Pinto or Vega.

### MORE STANDARD FEATURES.

Even the lowest-priced Corolla has standard equipment built right into the car that either costs extra or you simply can't get on competitive models.

Rear window defroster, fully reclining adjustable bucket seats, cigarette lighter, flip open rear windows, power front disc brakes, variable ratio steering, MacPherson Strut Independent

### WINTER TESTED IN CANADA FOR CANADA.

Canada's winters are among the toughest in the world. So we chose Canada as the location for testing the prototype equipment which is now standard on all the new Toyotas.

Our Corolla standard battery is bigger than some of our competitors' optional heavy duty models. Heavy duty starter, heavy duty windshield wipers and wiper motor are standard. The heater capacity is increased by 20% and there are wide heat ducts built into the rear passenger compartment.

A corrosion-inhibiting aluminum muffler and tail pipes are standard. And so is the corrosion-inhibiting paint treatment.

### 2 NEW SERIES.

8 model choices from 2-dr., 4-dr., and hardtop models in our economical 1200 series or from 2-dr., 4-dr., hardtop, SR5 and station wagon in our peppy 1600 series.

Toyota Corolla 1600 SR5.

## '75 TOYOTA COROLLA

Today is the time for choosing a car on fact, not fiction. And the facts prove that our Toyota Corolla 1200 gives you more car for less money than any other popular small car.

Our price is lower than that of any other popular small car. No comparable car offers the same amount of standard equip-

ment at anything close to our price.

Corolla is a proven car. It's a best seller in over 140 countries. It has taken Canada's top rally team to four consecutive National Rally Championships.

Parts and components are tested and retested, checked and

rechecked. Test cars are subjected to gruelling endurance runs. They are frozen, drenched and crashed. And they are driven under tougher conditions than you are ever likely to encounter.

Above all, we have the kind of pride in our product that has made us the third largest automobile manufacturer in the world.
