Now kids can
look it up in
their own
**Funk &
Wagnalls.**

After 60 years of making encyclopedias for adults, Funk & Wagnalls has learned enough to make one for children.

It's called the Young Students Encyclopedia. And it's designed to do something more than just get them through the next homework assignment—to make them want to learn on their own.

Instead of burdening your children with tons of forgettable detail, it appeals to their native curiosity. The article on *Airplanes*, for example, illustrates an experiment children can perform at home showing how things fly. There are hundreds of other drawings, games and puzzles that not only teach but provoke, involve and entertain in the process.

In other words, it's an encyclopedia children will actually use. They'll also use it a long time. It's designed to be simple enough for children just learning to read and comprehensive enough to serve until they're ready for an adult encyclopedia. They can't outgrow it the way they do shoes.

Which brings up another nice point about the Young Students Encyclopedia: it's intended exclusively to help children, but it helps grown-ups too.
