Woodbridge to hold Ont. meet

The Boyd Conservation Area at Woodbridge north of Toronto will be the site this year for the provincial Cross

Country Championships. It is expected that at least, 400 runners, ranging in age class from Bantams through to

Masters will compete in the event.

The races will vary in length from 3,000 metres to 12,000 metres through the age divisions.

The winners from these races will be selected to run for Ontario in the National Cross Country Meet, to be held in Halifax in mid-November. With the success that the GDHS cross country runners are enjoying, it is a good possibility that several Georgetown runners will represent Ontario in the November meet.

Dr. and Mrs. Brian Buckereil have returned home after spending a couple of weeks in Scotland visiting relatives.

The regular group of "The Boys" from the neighbourhood, who like to go North this time of the year, left this week on a hunting trip. Mr. and Mrs. Jamieson had all their family home for thanksgiving dinner on Sunday.

Site F group unimpressed with region decision

Stuart McFadden, head of the Tremaine-Britannia citizen's group opposed to the selection of site F was not impressed.

"I respect them for making a decision," he said after the meeting, "but I do not necessarily agree with it."

Reed condemns region

Julian Reed, MPP Halton-Burlington, has condemned the action taken by regional council to allow only drilling on Site F until its proved hydrogeologically unfeasible as a waste disposal site.

In a statement issued last week, Mr. Reed said he is urging regional council to reconsider using "500 acres of farmland as a dump site."

He says the region should be looking toward resource recovery to generate 100 per cent energy fuels.

"If they find something wrong hydrogeologically on (Site F), then it will be a long way down the road for approvals," he said.

He said his group will now seek "viable alternatives" as landfill sites.

The citizen's group has argued for the use of Site A, saying that it would be a short-term solution to landfill needs and provide time to prepare a resource recovery facility.

But Mr. McFadden said that a comment by Burlington Mayor George Harrington on Site A use "would blow it" if it is found correct.

Mr. Harrington told council that an attempt by Burlington to gain approval of landfill use on Site A had been rejected by the ministry of natural resources because of the "non-renewable resource" located there. The site contains about 40 million tons of clay, public works committee learned about one month ago.

The cost has been deemed prohibitive to purchase the needed 150 to 200 acres of land. The cost is estimated at about \$15,000 an acre.
