Stewarttown solar homes project gets approval

Contrary to the advice of the town planning department and Mayor Tom Hill, planning board has endorsed a proposal to build four experimental solar heated homes on five acres of private land off Trafalgar

Road south of Georgetown. Already turned down by the board last August, Wray Gib son and his solicitor Dick Herritt this time succeeded in convincing the board that the need for further research into

"No precedent"

"ied that town couned may be setting a dangerous precedent by endorsing a proposal to build four experimental solar-heated homes on Trafalgar Road south of Georgetown, Coun. George Maltby Monday night succeeded in getting the decision amended so that the solar homes will be considered a one-shot pilot mo'ect.

do for year others from takin, all attage of council's approvat of the solar homes Coun' Maltby added that the Wray Gibson hopes to build on his five-acre lot near Stewarttown, the project has been designated a pilot project that is not to be considered representative of town policy.

Town planning department and Mayor Tom Hill refused to endorse the proposal at last week's planning board meeting on the grounds that it requires four severances on asingle 5.5-acre site.

ned that, by avoiding a precedent, the town can consider any future proposals to build solar homes or other unusual projects on their own merits. prohibitive cost of building solar homes will no doubt prevent others from trying to fool council into letting them build new homes on severed

Industrial plan interests council

Halton Hills planning board has rejected the advice of its stalf in order to have a study faunched into a 625-acre industrial site proposed for development northeast of Georgetown.

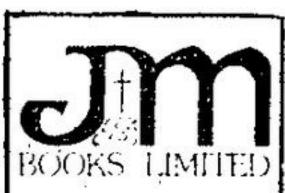

The planning department recommended council's disapproval of the proposal submitted by more than a dozen private landowners seeking an official plan and zoning bylaw amendment allowing the industrial and commercial use of caral and hazard lands.

The close proximity of several private residences and the anticipated loss of prime agri--cultural land prompted to the department to reject the prop- what the planners have repor-

The staff report also cites an opinion by regional engineers that such a development northeast of Georgetown would need to be accommodated by full impaicipal services, rather than private water and sewage Jacilities as proposed

"It is not possible to detername at this time what impact this natustrial proposal would have on the surrounding road sylem," the report states. · ."One mitigating factor would he that the ultimate mass Qualed system in the inbanform and decomes disjoint-- 'ed with greater costs if this - development were to pro-- ceed"

The report also points out that the Esquesing official

Coun. Pete Pomeroy explai-

plan and the still-to-be approved regional official plan make no provisions for any indust-

rial development in the area in

Coun. Pete Pomeroy, calling for a re-examination of the proposal by council's official plan review committee, contended that the transportation problems mentioned could be overcome so that the proposed site could be "plugged into" Halton Hills' official plan as a future industrial growth area.

"There are some very good reasons we should be looking at this proposal," Coun. Russ Miller agreed. "Contrary to ted, it is mostly poor agricultural land in that area and I think it would be best to get some dry industry on it".

Coun. Pat Patterson also challenged the region's opinion that the area should not be developed as proposed, saying that he will never support regional government in Halton because it has not helped citizens in the rural areas "in any way, shape or form".

Coun. Peter Marks suggested that the plan, if proven unacceptable at the site proposed, might be accommodated at a location adjacent to Acton, but planning director Mario Venditti observed that space is very limited in both urban areas.

Coun. George Malby noted that the proposal makes "a lot of sense" in terms of employment and service to George-

Halton's industrial development officer, Bill Marshall, informed the board that he receives one or two inquiries each day from major industries interested in developing "large areas" around Georgetown. The majority of the calls involve "dry" industry, he added, but despite a proven need in the region for such development, available space is limited.

the feasibility of solar heating outweighs concerns that arose over the possible setting of a precedent for the severing of

Mayor Hill pointed out that the town recently appealed a decision by the Hatton land division committee by which the construction of a single home on a two-acre site was

"There's no way we should be supporting four houses on five acres", he contended.

The town's deputy planning director Brian Kropf admitted in his report on the proposal that the town should be prepared to support "innovative programs designed to reduce man's consumption of scarce, non-renewable resources including fuels" but not, he added at the expense of town policies and recognized planning prin-

The proposal calls for the construction of four speciallydesigned, two-storey solar heated homes on the west side of Trafalgar Road where Mr. Gibson owns five acres immediately south of Al's Meats. Mr. Gibson's own home is situated at the north end of the five acre lot.

the development of solar heating at all government levels and named two federal programs through which Mr. Gibson may be able to obtain subsidy funding for his proposal. A patent is now being prepared for the unique shutter which Mr. Gibson has designed to be facing the sun at all

times, he explained. Anticipating the suggestion of several board members that the homes could better be built on land in Halton Hills that is already properly zoned for such uses, Mr. Howitt told the board that if Mr. Gibson must buy additional land for the project, his plans will no longer be financially feasible. Any concerns that Halton region may have over vehicle access onto Trafalgar Road will be resolved by the planned widening of the road between Ashgrove and Stewarttown, Mr.

Howitt said. The solicitor conceded that Mr. Gibson's proposal faces its biggest obstacle at the land division committee level, the approach to which he nevertheless described as the most practical alternative open to his client.

"I realize we're going to

severance proposals. "There's a lot of good building lots in the area that could be developed", he said, "I just wonder if what (Coun. Pomeroy) suggested is strong enough (to support the plan

"Maybe we shouldn't be appealing all these severance decisions," Coun. Pat McKenzie agreed. "In this case, two wrongs don't make a right. It's certainly not prime farmland we're discussing here".

Coun. Peter Marks offered his "total support" of the proposal, but suggested that Mr. Gibson should sell his designs to owners of land that is already zoned for such uses, then do his research on the homes at the appropriate sites. "This is far beyond our land

use policy", he warned. Mr. Gibson commented that it would be difficult to sell the designs and ensure that all agreement problems are resolved. Mr. Howitt cited the advantge of having the experimental houses close to home.

a precedent for severing rural land for solar homes and the like. Residential development must be prevented from encroaching onto land that is not designated for such use on the

towns official plan, he said. Additional support for Mr. Gibson's proposal came from councillors Pat Patterson and Les Duby, but board chairman Roy Booth remained wary about granting official endorsement to any reserch before all of the implications are known. Mankind already made one mistake by "jumping into" the use of atomic power, he cautioned.

Coun. Booth nevertheless supported the proposal and suggested that Mr. Gibson's homes be set up as a pilot experimental project and study area. He also urged the board to start re-examining its planning policies regarding

"Solar energy is something we have to look at, even though its application maybe in the distant future," he commented. "We've got a proposal here that's going to put us on the map. We should be proud that Coun. George Maltby strong- we have a man here who's ly advised the board not to set willing to tackle the project".
