# Town planning board reconsiders small lots

Concerns over traffic congestion along Highway 7 in Georgetown and the proliferation of small commercial plazas have prompted the town planning board to take a second look at a cluster of small industrial lots proposed for development on Guelph Street east of Armstrong Avenue.

Despite willingness on the part of planning staff and board chairman Ray Booth to approve the proposal in principle, intermediate planner Jim Shewchuk was directed dast Wednesday to reassess the plan submitted by Cherrytree elopment officer, Bill Marshall Developments Ltd.

. . The proposal involved a 9.5- to the proposal in its current acre site between the Neilson's plant and the United Co-operative Farm and Home Centre. where Cherrytree hopes to create 11 lots at least a halfacre in size for industrial use. Access to all lots was to be afforded by a single, central in-road off Highway 7, Planning staff recommended "general approval" for the proposal, conditional to details, such as lot size, being finalized to roy maintained. "We need the town's satisfaction.

### Taxpayers' group won't take active part in election

The Halton Renaissance Committee, a parents and taxpayers' organization founded several years ago to monitor the workings of the Halton Board of Education, will not be taking an active part in the forthcoming municipal election, according to its chairman,

Gordon Reade of Oakville. Unlike past election years when Renaissance has entered or endorsed candidates for the school board, Mr. Reade said, the committee now generally believes board members are gradually "coming around to common sense" and need not be directly challenged by designated Renaissance contend-

the floor space.

Cour. Russ Miller added that he could not accept a proposal for 11 small industrial lots, while Coun. George Maltby warned that the town would have to guard against "backdoor commercialism" in the form of second owners seeking permission for new uses of the

"I think there's already too many small industrial buildings in the industrial park," Coun. Walter Biehn agreed.

Cosm. Booth recalled that there has been a constant demand for small industrial lots since the days he served on the former town of Georgetown's industrial commission. Mr. Marshall, he added, has indicated that half-acre lots for industry are "very saleable".

"We've got to provide jobs," Coun. Booth fold the board, "so anything we can do to support industry in this town has to be done, I'd rather have a lot more traffic flowing onto Highway 7 than divert it onto the sidestreets. That's what the highway's for"

The staff recommendation requesting approval for the plan was defeated nevertheless. Allowing that she apprecrates the need for more industry in Halton Hills, Coun. Serjeantson said she could support the proposal if the developers could find a way around the traffic congestion problem.

"I'd like to see new industry here as bad as anyone," Coun. Miller said, "but we always seem to get inappropriate proposals that we jump at because there's nothing else. We get lots of promises for larger industries, but they always seem to go to Oakville and

Coun. Pomerny contended that the board is right to reject the proposal and this inform the developers that their plan is presently unacceptable. Cherrytree is fully entitled to return to the board with a revised concept, he pointed

Coun. Malthy warned that any development proposal for the site is going to require at least six months before it can be implemented, but the board voted to send the Cherrytree plan back in the hopes that improvements can be made.

Diane Alls models a tailored suit in grey tweed with black buttons. A black trench coat lined with matching wool and a tweed hat complete the outfit. The suit is worn with a white tailored shirt and a man's necktie.

This two-piece dress in mauve crepe patterened with purple teams with a mauve sweater in imitation chemile. The pleated wrap skirt is left open to show a glimpse of leg depending on the wearer's whim.

### Approval expected for operating budget

Halton Hills' 1979 operating budget is expected to be approved by the town's incoming council by Mar. 15, according to a budget schedule adopted by council this week.

Essentially the same as last year, the schedule will see budget forms, guidelines and a timetable placed before all operating departments by the end of this month. A draft budget based on all department requests would then be forwarded to the finance and administration committee for review by Feb. 15.

In the two subsequent weeks, the town works committee will examine its needs and submit revisions to the finance committee. Final adjustments will be made by the town treasurer in early March.

GRANT INCREASE Also accepted by council Monday night were guidelines for the budget, including assumptions based on available information that laxable assessment will increase by two per cent in 1979, provincial grants will increase five per cent, town revenue from licensing, permits and recreation will increase five per cent and the town will have a \$50,000 operating surplus from 1978.

At the same time, treasurer Hay King said, salaries and benefits for town employees are expected to increase 7.5 per cent, materials and supplies costs will increase six per cent and capital expenditures from the operating budget will increase six per cent.

According to Mr. King's guidelines, \$2,975,189 will have to be raised for general townwide purposes, for an increase of 11 per cent over 1978. Such a budget would require an overall mill rate increase for urban residents of 9.2 per cent, or about \$18 for the average home. Esquesing residents would face an 11.5 per cent mill rate increase, amounting to nearly \$19 for the average assessed home

Mr. King blames the province's decision to eliminate transitional grants next year for the larger Esquesing mill rate hike. As of 1979, he explained,

rural ratepayers will be taxed the same rate for general town purposes as the remainder of

DO BETTER

Coun. Roy Booth suggested that the town would do better to employ the newly developed "zero-base budgetting systern," by which all departments would begin their budgets with a "zero per cent increase" over 1978, and justify any increases from there. Mr. King responded that

such a system is not working effectively in any municipality where financial needs are welldocumented.

High lot levies concern board

The town planning board is concerned that lot levies being charged by the town and by Halton region for the develop- in levies to build. ment of residential accommodations in Halton Hills are high enough to be scaring would-be developers away.

A comprehensive report on the situation has been request-

Board chairman Roy Booth said that a reduction in levies for high-density apartment buildings, in particular, should be considered if the town is to overcome its "zero occupancy rate." The need for apartment accommodations is critical in Halton Hills, he said, because developers have been unable to afford such facilities as a result of high levies. ROARD REPORT

In his 1976 report to the board, Mr. King recommended the adoption of a levy rate schedule by which the town charged \$900 as a development levy for high-density apartment buildings with more than three stories, based on an estimated per capita cost for the construction of the building of \$332. The region charged another \$300 for the same building, bringing the total levy for the developer to \$1,200.

Hunter, his son, a licensed broker. Mr. Hunter himself is semi-retired from the business handling only occasional general insurance policies for Halwell Mulual Insurance. HASTIME

Having all but withdrawn from the business in which he has been involved since 1949, Mr. Hunter believes he has the time and experience to meet the needs of Ward 3 voters.

He stated his opposition to the town's current policy by which councillors are given their financial stipends whether or not they attend all meetings and promises he will oppose any suggestion that the amount of the stipends be

raised. Mr. Hunter added that, it elected, he will strive to help the town find land in its urban areas to suit the needs of industry and commerce, but cautioned that the town must try for options, rather than the outright purchase of land.

Elsewhere in the report, Mr. King explained that some of his conclusions and recommendations were based on the assumption that Georgetown will grow in population to 30,000 during the next ten years, while Acton's population will increase to 10,000 and Esquesing's will grow to

High density apartment

buildings for senior citizens

cost developers a total of \$885

Ward 2 Coun. Pat Patterson questioned the population forecast for the rural area, pointing out that the region wants to "freeze" rural lands to their current uses. Planning director Mario Venditti answered that a 5,000-resident increase in Ward 2's population is "realistic" according to expectations for the expansion of the ward's hamlet areas.

15,000.

RURAL LEVY Coun. Patterson asserted that a rural lot levy of \$200 is also realistic.

Coun. Booth advised the board that clerk-administrator Ken Richardson has deemed the town's policy for accepting a portion of a developer's site plan area for parkland or five per cent of its development cost "not definitive enough". A
