

If you've been heating with warm and friendly natural gas,

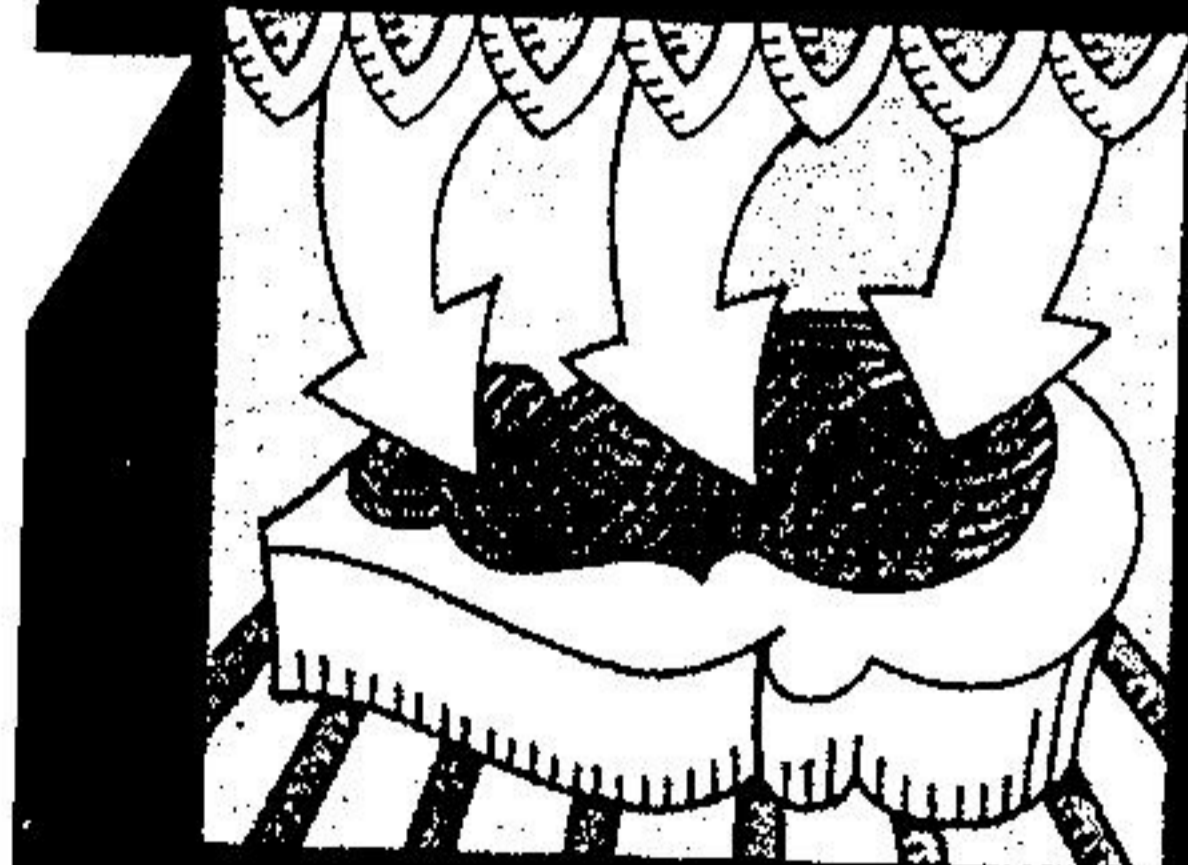

why aren't you cooking with natural gas?

CONTROL! Turn on exactly as you want it. And off, off, instantly! Once you've experienced cooking with natural gas, you'll never want to "buffle" a pot of a butter again.

FAST! A flame is a flame and gets you cooking as soon as you turn it on. If you're doing several things at once, that kind of speed helps everything come out right at the right time.

TASTY! There's something about broiling under a flame that just seems more natural. And, because it's smokeless, you broil with the broiler door closed.

RELIABLE! There's nothing simpler than a natural gas flame. It's there when you need it. As long as you've got natural gas, you're cooking!

What can warm and friendly gas do for you today?
