Hurley fires five to defeat Brampton pee wees

In a close fought game in Chinguacousy Saturday, Georgetown minor pee wees were defeated 2-1.

That winning goal by Ching may have been the extra shot they had over the local side as they outshot them 13-12.

Georgetown got their only goal of the game when Mike Hurley scored unassisted in the third period of the game. It was one of six shots the team peppered that period.

The week before they defeated Brampton here at home 6-1. Mike Hurley got the game off to a quick start 45 seconds in on a pass from Pal Braund. Mark Hourie from Chris Hodgins made it 2-0 at 2:05. Danny Kent from Hodgins and Hourie scored at 3:47 then Hurley and Hodgins teamed up to score at 9:03.

There was no scoring in the second. In the third Hurley

fired his third and fourth goals of the game from Jon Hammer at 4:55 and Mark Pries at 5:41.

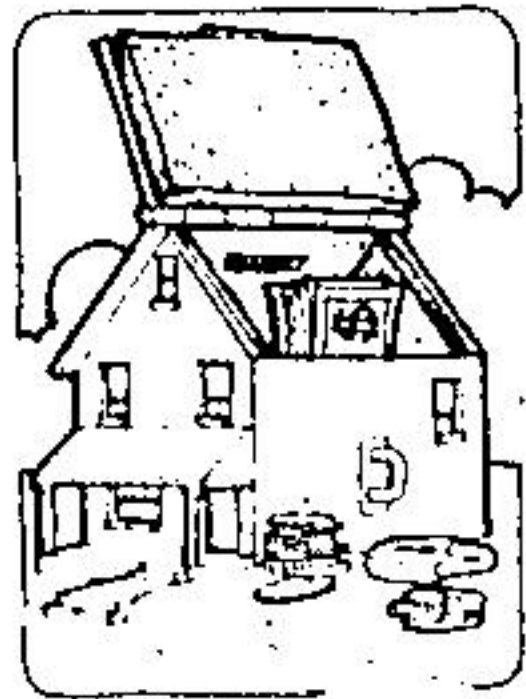

Brampton broke the shut out at the 7:43 mark of the period. Georgetown outshot their guests 31-16.

Their next home game is Thursday at Memorial Arena at 8 p.m. when they host Oakville. Last night they had a big game against their rivals from Milton.

Chapter 9 Dollars & Sense

ANNOUNCING NEW GOVERNMENT INSULATION GRANTS

Energy conservation in the form of home insulation is one of the best investments that you can make today, paying large dividends immediately in the form of decreased heating costs. Unlike many other forms of dividends, these are "tax free"! Home insulation is better than just about any other low-risk, long term investment you can make! In most cases, your initial cost will be recovered in a maximum of five years. After that, it's money in the bank!

Even at current fuel prices, insulation will pay for itself many times over during the life of your house. However, if you don't plan to live in your house long enough to reap the full return on your investment, you will still be ahead because your house should be easier to sell at a higher value, and, of course, it will be more comfortable.

All this aside, the investment is still a good one—since it is an investment in the conservation of our valuable energy supplies.

FOR HOMES BUILT BEFORE 1961
