

Family asthma program offered

The Halton Lung Association is continuing to offer a "Family Asthma Program" locally. All children with Asthma and their parents are urged to attend. The child will participate in a Physical Conditioning Program including one hour of instructive swimming, breathing and relaxation techniques that will enable him to cope with and manage his problem. The parent will be involved in an educational program including presentations by asthma specialists in the medical, pharmaceutical, dietary and physical fitness fields.

The Halton Lung Association welcomes all children who suffer in any degree from this disease. There is no age limit. The program is under the medical direction of Dr. R.W.T. Haddon of Burlington and developed by Mrs. Susan Alcock, Physiotherapist-Consultant of the Halton Lung Association.

The Halton Lung Association offers this program free of charge to the community and is able to do this through community support of their Christmas Seal Campaign. The course is available at the Georgetown District High School pool, 10:00 to 11:30 Saturday mornings between March 8 and May 24.

Please call the office of the Halton Lung Association, 827-7973, between 9:00 a.m. and 4:30 p.m. or Burlington 527-4688 after 5:00 p.m. for registration information.

Rebuild cruisers, police decide

Halton Regional Police will continue to rebuild some of their cruisers on an experimental basis for the next year. The police commission began an experiment last year of rebuilding cruisers which were ready to be traded in. The repair work includes a new engine, along with any other mechanical work necessary, body work, painting and any re-upholstering or refinishing necessary for the interior.

The commission normally receives a trade-in allowance of \$950 on a car which has been driven 100,000 kilometres. A new cruiser costs about \$7,000. The commission set a limit of \$2,500 to be spent on rebuilding cruisers, which could then be used for another one or two years.

One cruiser, a 1978 Plymouth Fury, was selected as a test vehicle. It had been in service since June, 1978, and had an odometer reading of 104,000 kilometres. The work was completed on this cruiser for about \$2,300, and the cruiser was parked outside at the commission meeting for inspection.

Oakville Mayor Harry Barrett, chairman of the commission, suggested that the rebuilt cruisers be painted as unmarked cars, and their life would be extended, rather than using them as cruisers.

save \$350 on complete system

High quality components combine for sound close to live performance!

4-piece system includes:
• 2 Optimus™-10 speakers. Passive radiator design. 8" woofer & 10" drone are acoustically coupled. Drone functions as a 4-1/2", 9" dia. tuned port. 3-1/4" tweeter. Variable brilliance control. Solid 42-20,000 Hz response. Recommended power handling 75 watts. 40-2028
• LAB-400 fully automatic direct-drive turntable. Push lever to start. Then relax and enjoy the music while turntable does the work! Tone arm returns to rest & motor shuts off after record is played. 16-pole brushless DC servomotor — wow & flutter below 0.03% WRMS. Excellent magnetic cartridge. 42-2960
• STA-95 AM/FM stereo receiver. A star performer with glorious high fidelity sound! 45 watts RMS per channel. 0.08% THD. FM tuner uses advanced technology (dual-gate MOSFETs plus PLL) for really superior FM reception. 25/75 microsecond de-emphasis switch lets you enjoy correctly equalized sound from any FM broadcast, Dolby or standard. Signal strength and centre-channel meters. Loudness and high & low filters. Deluxe taping features — you can record on 3 decks at once and dub from one to the other two. Main/remote speaker switching, stereo reverse switch. Bass & treble controls. 31-2082
