By R.C. (BOB) OLLIVIER

Fishing was good over the long weekend, even though it was slow Saturday. For a while it looked as if the fish were ready for us, but the weather closed in Sunday and Monday and got the fish biting again. Why not give me a call and let me know how you did on the weekend? Phone 877-9250 and let us in on your good times.

It was generally found that the fish were deep, after the spawn and Walleye's went for a "thumping spinner" such as the Mepps.

One of the best ways to get slow feeding fish is with a Mepps spinner "sweetened" with a worm or a minnow. Sometimes just the tail of a minnow or a piece of fish flesh will turn the trick and put the fish in the boat, but the spinner should be fished ticking bottom.

Remember that game fish feed on minnows and these prey species are very small at this time of year having just hatched from the egg, so go natural and use a small lure. The occasional exception is the Walleye feeds on Smelt and these are still large, up to six inches. The Number 18 Rapala in silver is a good imitator of this food species, but once again they are on bottom and S-L-O-W.

Shallow lakes such as Fairy Lake in Acton can be fished more to the surface and faster but should be over the deeper sections of the lake.

### FAIRY LAKE

In regards to Fairy Lake, a quick letter to the Ministry of Natural Resources may get them to provide some protection to the fishery there. Most problems of this type generally need a prod from the public, and that is you. If you don't help now, there may be no fishery in Acton, as they will not stock any lake as long as there are some fish in the water. If it comes to this (no fish) they will review the lake and it may be several years before there is a catchable fish in the lake.

### MOOSE MEETINGS

The Ontario Federation of Anglers and Hunters is working hard on their moose proposal. Many meetings with the ministry have just brought frustration. In the words of the federation: "we have thoroughly discussed the information the ministry gave us and firmly believe Ontario's moose are not being protected properly. At the same time, hunters are being unfairly restricted because a meaningful moose management program is not in place."

One of the concerns of the Federation is the clearcutting practices of the major lumber companies. We, the Federation, propose a maximum of 300 acres in size with the optimum about 120 acres. Some of the clearcuts are as much as 12,000 acres. Ontario's wildlife deserves more protection than that.
