HOME OF THE WEEK

SPACIOUS & STYLISH SPLIT LEVEL HOME
 This three bedroom split level home design is perfectly suited to the medium frontage residential building lot and provides for almost 2,000 square feet of well-organized finished floor area on its three levels. The handsome exterior finish, in horizontal channel siding, with fieldstone veneer accent, planter and chimney, front-facing bow window and shuttered upper-level windows creates an impression of a much larger and prestigious older home.
 The deeply weather-protected main entry opens into a commodious reception foyer and outer-wear storage area, from whence, traffic may move forward and to the right, into the large lower-level family room-T.V. lounge, or left and up a half-stairway, directly into the large L-shape living-dining room combination. The living room features a wide, full-height bow window and a corner-positioned, raised-hearth masonry fireplace. The dining area has a wide china cabinet alcove and a sliding glass walk-through which connects to a large rear-facing patio.
 A large and well-planned U-shape kitchen and dinette area separates from the formal dining area and main hallway via convenient pocket doors, allowing the area to be completely isolated for privacy and hygiene. The kitchen has abundant countertop work surfaces, generous cupboard storage and a step-saving work triangle configuration. The dinette may be furnished with built-in nook furnishings or a traditional dining room suite, or could easily be modified into a convenient snack bar counter, for those who prefer. The dinette connects via sliding glass doors to the rear patio, for convenient access to summer barbecues.
 The lower level family room is reached via half-stairways: one from the dinette, the other from the main hallway adjacent to the living room. The family room contains a convenient laundry-utility area behind lowered bi-fold doors, and a sliding glass walk-through opening onto the rear-facing patio. A convenient two-piece vanity bath is easily accessible from all lower level areas.
 The double enclosed garage has a convenient designed-in alcove for the installation of either a mud room area or, more likely, a built-in workshop area for the would-be mechanic and home handyman.
 The topmost or bedroom level is reached via half-stairway from the hall adjacent to the living room. All three bedrooms are grouped around the central bathroom and linen storage closet, and each has excellent natural light and generous closet storage facilities. The large master bedroom has separate his and hers closets and a three-piece ensuite bathroom with shower, behind a space-saving pocket door. The central bathroom sensibly features a vanity area separated from the tub and commode, for greater flexibility.
 The active larger family will find this home design provides all of the modern conveniences with style and practicality.
 Plans for design No. 80-1907 may be purchased either by the single set, at a cost of \$95.00 for the first set and \$20.00 for each additional set, or by the package.
