**A Break for Small Firms**

By W. Roger Worth

Finally, most provincial governments have recognized that small businesses are decidedly different than the powerful national and multi-national companies that sometimes control the marketplace.

The evidence: during the last few years nine of Canada's ten provinces have adopted proposals to provide a lower corporate tax rate for smaller firms.

While there are a variety of reasons for the increased support for independents, it appears most provincial governments now recognize that smaller firms are creating a majority of the country's new jobs.

**Wood Heating without Creosote**

Creosote is the ill smelling brown liquid caused by incomplete combustion of wood. When wood is burned slowly it produces acetic and pyrolytic acids which combine with moisture to form creosote. Although it is unpleasant and can be dangerous, it is not a necessary evil associated with the use of wood for fuel.

The home owner should have few problems with creosote if he follows a few simple steps:

- The proper installation; if the connecting pipe path is long, use a double-walled pipe;
- Reduce pipe path, if possible, by moving heating unit closer to the chimney;
- Use a chimney cap to provide better draft and to keep chimney temperature higher;
- In mild weather, instead of a long low fire, use a short hot one, or several short hot ones each day.

For safety purposes inspect your chimney on a regular basis. If cleaning is required call a chimney sweep. On a do-it-yourself basis, use a snug-fitting chimney brush. Creosote may be difficult to remove therefore be careful of mortar on a masonry chimney or the stainless steel liner of a prefabricated class "A" metal chimney.

For further information contact your local Fire Department

Not You  
"I can't hear you, son," mom said as Johnny was whispering his prayers.  
"I'm not talking to you," the youngster replied.
