

# CVCA receives \$22,240 grant

Natural Resources Minister Alan Pope has announced a grant of \$22,240 for a multi-year forest management program to be undertaken by the Credit Valley Conservation Authority.

The proposed forest management will be carried out at Forest Conservation Area Number Two in Caledon, between Bellfontain and Terra Cotta. The property is 36 hectares in size and includes extensive areas of sugar and red maple hardwoods and red and white pine conifer plantations.

The Authority proposes to manage the area in accordance with the approved forest management plan for the purpose of producing good quality hardwoods and conifers and maintaining the natural resources associated with the area. Various forest management techniques will be implemented including pruning, thinning, sanitation and stand improvement cuts, underplanting and construction of a fire pond.

## HALTON 4-H Dairy calf club

By BEV WICKSON  
Halton 4-H Senior  
Dairy Calf Club

The second meeting of the 4-H Senior Dairy Calf Club took place recently on the farm of Jack Proud. A roll call was given, followed by the business. Following the introduction given by the members who had presented the meeting - Randy Proud, Jamie Alexander, and John McPhail - we were given a class of age cows to judge and to contribute reasons.

George Wood, Veterinarian, the guest speaker for the evening, gave quite an experienced talk on how to locate problems on a cow. For an example, how to discover some common diseases, and what medicine would fit that particular disease.

The meeting was then adjourned, and after, donuts and pop were served.

## Conser- vation club

By DAN WICKSON  
Halton 4-H  
Conservation Club

"Safety First" was what it was at Consumers Glass in Milton, as the Halton 4-H Conservation Club held its second meeting there May 12.

As the nine members present checked in with the security guard, they were given safety glasses and name tags. Before taking a tour of the factory, a conference was held with the 4-H members and the main point stressed was safety. Each member was told to keep safety glasses on at all times and to keep in the same area of the tour guide and also to watch where they were stepping. An excellent tour was given by Bill Pender as he showed the members the fully computerized factory.

The factory has 16 silos seven stories tall, filled with material to produce glass. The factory produces about 797 tons of glass in a 24 hour period. The factory employs approximately 200 people. The main computer room was shown by Archie Lyons and a demonstration given. The main reason for the Conservation Club holding its meeting there was that the glass company recycles broken glass and bottles, helping to keep the environment clean.

Each member was given a sample bottle made in the factory. All the members were amazed to see how the glass was made and they all came out knowing a lot more about glass.

Are you NEW TO TOWN,  
or have you just moved into  
a new home?????
