Hoping to develop an interest in nature photography among amateur shutterbugs, the Credit Valley Conservation Authority continues to conduct special photo sessions at Terra Cotta Conservation Area. Tonight's (Wednesday's) session, designed as usual for novice photographers, features instructional films and plenty of worthwhile hints on nature photography. The session runs from 6:45 to 9 p.m. inside the park's interpretive centre.

Halton forest a 'gift'?

Regional council will ask the province's natural resources ministry to write off a \$200,000 debt before the Halton Regional Conservation Authority takes over control of a 990-acre forest located next to the Hilton Falls Conservation Area in Milton.

The forest, covering about 1,200 acres of the Hilton Falls Environmentally Sensitive Area, has been managed by the ministry under a special agreement in which the property management costs were partially covered from the sale of forest products.

But members of the region's finance and administration committee last Wednesday decided that because the revenues don't completely pay for the management costs, the ministry should be happy to give the property back to the Authority, dropping the deficit. Costs to the authority would be relatively minimal, although it would mean probably an additional \$2,500 spent on maintenance and security on the property.

A popular recreational area for snow-mobilists, all terrain vehicles and naturalists, the forest is in an environmentally sensitive area. Transferring its management to the Authority, a regional planning department report states, would mean a "substantial improvement in security and control".

Regional council is expected to discuss the proposal at its meeting this afternoon.

HOW FAR CAN YOU GO ON \$2.25?

That all depends on how you go. A taxi would take you about 2.2 kilometers. Your own car would get you about 11 kilometers. And once you got that far, you'd probably have to pay for parking.

GO Transit will take you 43 kilometers, in comfort, for \$2.25. Of course, if your trip is shorter, it'll cost you even less. That price includes the fare increase effective July 1. Our fuel costs have risen 54% since the last fare increase, and are expected to rise further in 1981. Government subsidy keeps your portion of the cost lower than it would otherwise be. By comparison GO Transit is still, the best way to GO.
