Getting lost in the bush

If you have not got your archery gear ready for the deer season yet, then you are probably too late. However with dedicated practice you may be expert enough to try for that magnificent game animal. Your skills will be tested to the utmost, and your tracking must be of the best.

For the beginner the Astro Daco Hornet would probably be a good choice of bow, and Fred's in Norval sells them for less than \$100, and the expert can also get his top quality material there.

Check to see if they have anise oil, which I would recommend for a masking scent. This is natural product and to the best of my knowledge does not repel or attract deer.

It simply masks your smell and that is asking a lot of a product. Mate quality products of Georgetown is now marketing anise oil, or should be by this time. Personally I use anise oil for hunting and fishing, and even when taking nature photos.

GETTING LOST

While we are on the subject of hunting, what about the possibility of getting lost in the bush. Moss on trees can be a good method of locating direction, but bear a few things in mind.

Moss remains on the north side of a tree, whereas it rots and decays on the south side. Branches are also larger and leaves more luxuriant on the south side of a tree.

NAVHDA dog club news; although a specially breed club, much can be learned by the average dog owner. A recent Utility test had 15 separate tests for points.

These range from searching for ducks to desire to work to handling and obedience. Other trails use only seven tests, but all are made to test the ability of the dog to work. Once again contact Bob Catton, 12 Chestnut Place, Guelph, Ont. N1E 6L7 Normark Corporation has released several new products to the market. New Rapala Magnums, sizes 11 and 14 are designed for muskie or large pike. Made of African hardwood for durability they feature extra strong triple strength saltwater hooks.

I say designed for muskie but in reality they are for the salt water fisherman but excellent for our freshwater tiger. Normark also has introduced in limited quantities, a 10 1/2 inch Special Magnum Rapala 28.

New knife by Normark Corporation.

If you like a big lure for big fish, then here it is. Another Normark release is their knife sharpener. This unit has two ceramic "crock sticks" of the purest aluminum oxide, which combine the abrasive action of a whetstone and the edge realignment of a butchers steel. Use in kitchen, shop or tackle box for the best in knife edges.

Want Pink Salmon? try Sault Ste. Marie. The run should be nearly over, but there should be enough fish around for a little excitement if you go this weekend.

POWER SURVEY

John Power recently mentioned the survey done on salmon fishermen by the folks over at McMaster University. Nothing to worry about, so far as I am concerned, but I don't believe you should be eating 300 pounds of fish a year anyway.

At least not from any of our lakes. Not only is it a risk to health, but that is a waste of our resource. Try to practice catch and release, and don't worry about the occasional meal, like once or twice a week.

The bulletin of Environment Ontario comes out regularly and the most recent gives a clean bill of health to most fishes of our lakes.

Coho from Lake Ontario at Bronte Creek show no restrictions whatever, until you get into the real large fish. I have the list if you are worried, just call me at 877-9290 for details of the water you fish in Ontario.

Problems of course at Niagara. The Hooker Chemical Company has been leaking chemicals into the Niagara River and the source is just 200 yards above the intake for the water source of the city, where 380,000 people get their water.

Check with the Ministry of Natural Resources for the booklet "Wildlife Management Areas in Ontario". This will get you into some great hunting areas that you may not have known about.

This is a co-operative venture by the Ministry and local Farmers. Respect their land and you may have good hunting there as well as the conservation areas that are open.

Our local conservation authority will not open any of its lands to hunting. There are too many anti-hunters on the board.

Key is concentration

Concentration is the key to success in 5-Pin Bowling. Don't distract other bowlers when they step onto the approach for their turn to roll.

GOLDEN MOMENTS

Scoring opportunities like this one last Sunday night in Georgetown Junior B action came in sporadic moments for the Gems who saw a 5-3 lead dwindle to an eventual tie against the Milton Flyers. The Gems started the game strong, but seemed to lag as they built up a strong lead. Coach Dave Switzer was unhappy with the tie, but with players out of the lineup the calibre of Ed Dwyer, Mike McMenemy and Chris Peavoy, the team lacked balance and they failed to regroup when under pressure.

Industrial

Preview look at hockey season shows Norval still team to beat

After polling coaches and managers from Georgetown's Industrial hockey league, the top four teams all agree that Norval's Hollywood Tavern will again be the team to beat come play-off time.

The Herald's preview look at the Industrial season found that most coaches saw their team as being improved over the season, having picked up various key players to add to their roster. League defending champion Hollywood Tavern perhaps suffered the greatest loss in player personnel over the summer, but coach Norm Lockhurst promises, "we'll be there," for the final round of the playoffs.

Here is a look at how the top four teams from last season rate themselves:

Norval

Norval: Coach Norm Lockhurst says that with valuable veterans such as Ray Inglis retiring, their shoes will be hard to replace. "You never replace a guy like Ray Inglis," Lockhurst says. Also calling it quits for Norval this season are Doug Anderson, Bruce Lewis and Tom Gilbert. But to offset their loss, the team has picked up Randy Robbins, Bob Inglis, Mike Richmond who was trying out for the Raiders and Bruce MacPhail from Acton.

Lockhurst says the team will still have a potent offence: "We still got (league-leading scorer) Brian Beaumont at centre". The coach is glad to see Brad Butterworth back with the team after an unfortunate eye accident last winter. Lockhurst figures the team will finish first this season.

Wilson

Wilson Insurance: Coach of Wilson Insurance, Colin Broadbent says some excellent prospects have helped his team which finished in second place last season under the name of

United Rentals. Les Wilson has been added to the team and he was the MVP for Milton's Industrial league the coach says. Larry Scott who's also from out of town looks like an excellent hockey player says Broadbent and Chubb Tost, the goaltender from Bracken's will be a fine addition. In the back-up role to Tost is Georgetown's Craig Netten. From the Burlington Junior B's the team has recruited Mike Innis.

Returning to the club are ex-Junior B Geminis Steve Crossman and Dave Patterson. Centre Brian McKenzie is returning and former

Brampton Junior B Chuck Williams will be back. Scott McClelland and Steve Roland plus Tom Davies, Chris Broadbent, Marcel Trudel and Davey Patterson are other players returning that should help the club, the coach says.

Broadbent says the team this year will be a lot different from last year's team. The club will be faster with a more solid defence with lots of offence, he says. With Billy Held no longer the goaltender, the team has replaced an equally as good one with acquiring Chubb Tost, Broadbent says. The coach doesn't see any

weaknesses in the team and he feels Wilson Insurance can finish first in the league this year. The team will play a hard-skating and hard-hitting game. "I like to fore-check in their end. With the team I got we can do that," he says because of the youth on the team.

The coach sees the most improved team in the league probably to be Glen Williams' De Boer's Movers (formerly Dave's BP). Perrin Gardiner says the team has added a few players which should help the team. There is an
