PETER OR YVONNE

A circular staircase has always been the hallmark of elegance - naturally there is one in each of these luxurious homes from Bayfield. A central hallway of breathtaking proportions leads one to the graceful curving staircase open to the second floor. One model (The Blue Orchid) has a full two storey foyer, culminating in an interior balcony overlooking the front hall.

Each home is a masterpiece of spaciousness and sensible planning. The cooking and eating areas are separated by an "island counter" so that both activities can take place in one bright open space. Elegant pot lights over the counter provide ample light for food preparation. Best of all is the greenhouse breakfast area: the enormous dinettes (12'x10' in the Trillium model) extend right from the back of the homes and are surrounded by glass on three sides including a convenient walk-out to the patio.
