

GOOD NEWS!

Good news for nature lovers: the Bruce Trail Association contributed \$37,000 towards the purchase of an 89-acre property which the Credit Valley Conservation Authority acquired recently to link the Silver Creek Educational Centre with the Terra Cotta Conservation Area. At the cheque presentation Thursday at the CVCA's Meadowvale headquarters were (left to right) Bruce Trail Association president Eric Kennedy, CVCA

chairman Harold Stewart, CVCA land resources manager Harry Watson and CVCA general manager Glen Scharr. The donation comes from the Association's Niagara Escarpment Preservation Fund which has made other major contributions to land preservation of areas surrounding the trail. A tax deductible contribution to the fund can be sent to the Bruce Trail Association, P.O. Box 837, Hamilton, L8N 3N9.

A COED job-creation program

Projects suggested for town use

Clerical and public works projects have been suggested as ways in which the town can use the \$116,300 offered to it through the Canada-Ontario Employment Development program (COED) and other subsidized job-creation schemes.

The programs, designed to create jobs for individuals who have exhausted their unemployment insurance benefits or who are now on welfare, were announced last fall. Earlier in January, the town was informed of its portion of the \$50 million set aside for municipalities.

Twenty per cent of the costs of each project must be funded by participating municipalities. In a report presented to the town's general committee, the clerk-administrator's office suggested the following projects which the committee endorsed (the money will be released once the projects have been approved by program officials):

- Building and improvements at, among other locations, the Prospect Park tennis courts in Acton; a public address and music room at the Gordon Alcott Arena in Georgetown; energy conservation work at the Georgetown firehall and a boathouse and dock at Acton's Fairy Lake. The improvements project, including labour and town share would cost about \$70,000.
- A \$44,700 project which, among other things, would build a miniature golf layout for Fairy Lake; new washrooms and a fitness trail for Cedarvale Park and construction of picnic tables.
- A \$22,300 project which would hire clerical people to conduct a title search for town owned land; build a computer inventory of the town's catch basins, sidewalks, curbs and gutters, signs, parks and culverts; start a microfilming program and pave the way towards better records management.
- Carry out storm sewer work at Remembrance Park in Georgetown (\$52,000).
- Hire an energy coordinator to trouble-shoot for energy deficiencies in municipal buildings. This project would cost about \$4,000.

If these projects are approved by council and program officials, they will cost a total of \$183,765, mostly paid by the federal and provincial governments.

ASTRO ADVICE
by Eugenia Witham

Dear Astro Advice,
What does the future hold for my sons? The older boy was born in Brampton May 5, 1972 at 12:50 a.m. His brother was born in Georgetown March 25, 1975 at 2:04 p.m.
Enjoy your column very much!
A curious Aquarian Mother

Dear Aquarian Mother,
Your oldest boy is a Taurus by sun sign only. Although it gives him stability, stubbornness and loyalty where education, friends and relatives are involved, the Gemini versatility, agility and restlessness is more predominant in his chart.
His chart indicates that he will show a strong drive to achieve distinction through intellectual and mental accomplishments. He has the ability to think rapidly and may produce many original ideas. However, he can be impulsive when making decisions. The planet Mercury is afflicted in his chart which can make him irritable and quick tempered at times.
He appears to have an ability in writing, printing, publishing, teaching, broadcasting and other communications media. He has a liking for outdoor competitive sports which makes his chart favorable for coaching and teaching physical education. Jupiter indicates that he can achieve his goals through friendships and group activities.
He is kind to his friends, resulting in being well liked and attracting those who are generous and helpful to him. However other aspects in his chart indicate that at a financial level there could be ulterior motives and sound financial advice might be necessary at some point in his life. His profession could prove to be unusual or have bizarre circumstances surrounding it.
He appears to have an intense love of life, emotional warmth, and is aggressive concerning love and pleasure which can cause impatience and jealousy within close personal relationships. He could tend to be somewhat impulsive in spending his own or other people's money. However, his intuition will play a role in creating opportunity for financial and domestic progress.

BEYOND CONTROL
During 1983, he will have to watch out for deception where friendships are concerned. There could also be a disruption of his personal life due to changes beyond his control. Old friends may reappear in his life and he could come into an unexpected gift or inheritance. There will be changes in his home and daily routine. He could go through a period of rebellion against authoritative figures.
Where sports, hobbies and education are concerned practical determination, discipline and hard work will result in accomplishment. He should show a greater interest in art or music this year and an effort to prompt such endeavors is a must, but you must also watch that he doesn't spread himself too thin at the same time. There should be family trips, and improved family finances and visits from friends, neighbors and relatives.
Your younger boy is an Aries, making him full of creative energy and enthusiasm which must be directed in order to accomplish all that he wishes. His impulsiveness and inability at times to listen to good advice can tend to get him into difficulties. He would make a good leader and likes to be first and best in whatever he does.
A great deal of his strength arises out of his refusal to admit defeat. His emotional well-being in general depends on material comfort. He appears to have a very vivid imagination and an ability to tune into the thoughts and moods of those around him. His chart indicates that his emotions are too easily played upon due to his sympathetic nature.
Emotional security and stability within his home environment are important. His sense of touch is highly developed and he should enjoy physical contact with loved ones. He could choose a profession related to the arts and achieve recognition in the area. His chart also indicates good organizing ability which can lead to work in mechanical, electronic and other engineering fields. He must be allowed to do things in his own way and to learn by his own mistakes.

FOND OF TRAVELLING
His fondness for travel gives him abilities where sales, public relations and travel agencies are concerned. His chart indicated an unusual home life and family connections, it may also contain many gadgets or electronic devices. Close friends are accepted as members of the family. There could be changes in his family and domestic situation from time to time. He shows grace and skill where thought, speech and writing are involved which could result in literary talent.
In general, he is honest and can detect insincerity in others. Where high education is involved, he'll have to work hard and use discipline in order to be successful. At times he may have difficulties keeping secrets and there is also an indication of absentmindedness. His progress where educational pursuits are involved could be blocked due to ill health. His intuitive ability gives him an instinct for being in the right place at the right time.
During 1983 there will be opportunities for inner growth and development. He could receive an unexpected gift or inheritance. There should be a greater involvement in groups or organizational activities of an unusual nature. Disruptions in his daily routine may be a direct result of problems with electrical difficulties and utmost caution must be taken. It will be a good year for self-improvement and having a positive mental outlook. There should be opportunities for advancement and growth along educational lines, as well as being favorable for sports and outdoor activities.

Pivot point will link highways

A small section of Halton Hills is being singled as a pivot point for two stretches of proposed Highway 407 which will eventually link Highway 403 to the south with Highway 10 to the west.
Provincial transportation and communications ministry plans envision a major intersection where the northernmost and easternmost points of Highway 407 meet at Highway 401 between the Ninth Line and Winston Churchill Boulevard.
In the long-range plans, the Ninth Line would end at the 401, but an arterial route stretching north from the proposed intersection and jogging west slightly would connect with Regional Road 13 (Ninth Line).
Ministry officials Roger Hamner and Ian Williams presented the proposal to the town's general committee Monday night. The committee eventually called for a staff report on the project. No firm response to the project will be given until public meetings are held in the area in March.
The ministry has asked council to eventually approve initial plans of the Highway 401-407 interchange, the alignment of Highway 407 just south of Highway 401, the closing of the Ninth Line at Highway 401 (there's now a bridge spanning the route) and the arterial road connecting Regional Road 13 in Halton Hills with the proposed intersection.
Mr. Williams was optimistic that the arterial road could be built with minimal inconvenience to nearby property owners. In the ministry plans, the link between Highways 401 and 403, a newly constructed east-west route between Mississauga and Brantford, would be constructed most likely at the end of the ministry's five-year highway construction forecast. The east-west route to Highway 10 would follow at some indefinite time.
Among other transportation advantages, a ministry report states, the north-south Highway 407 link would take up much of the truck traffic travelling along municip-

al roads from Oakville and Burlington to get to Highway 401. And it would distribute more evenly the flow of east-west traffic along the Queen Elizabeth Way and Highways 403 and 401.

Although it will initially be constructed as a four-lane route, Highway 407, according to traffic plans extending into the next century, would widen into a six or eight-lane freeway as demand increases.

The times and places of the public meetings are expected to be announced later.

Behie, Crimes elected

Jeanette Crimes and Winnie Behie have been installed as 1983 president and vice-president, respectively, of the St. Andrew's United Church Women.

Rev. Tom Bandy installed the new slate of officers at the recent annual meeting in Georgetown.

Also on the executive are past president Margo McVittie, secretary and publicist Ann Jones, treasurer Ruth Watts, program convener Pat Bell, social convener Nancy Thompson, community, friendship and visiting convener Marjorie Gourley, membership convener Ollie Terrell, literature and communication convener Betty Pickup and supply and welfare convener Florence Baker.
