Here's decorating magic that turns the chore of colouring Easter eggs into a delightful experience. No more kitchen mess — stained countertops or colours that drip.

Now we are offering an exciting, totally different way to create your Holiday Baskets and centrepieces that's easy, fun and will amaze your family and friends.

It's easy because all you do is hard-boil a large egg...let it cool...slip one of the imaginative thin plastic sleeves over the egg...dunk in boiling water for 3 seconds...and amazingly you have an egg that looks as if it were hand-painted European porcelain.

You'll be astounded as you watch the egg being transformed — as the thin plastic sleeve molds to the egg.
