

Adrian Smith entertained a small gathering last Wednesday night at the Georgetown Public Library, talking about "Old photographs". He brought with him a wide variety of cameras used throughout the ages. Mr. Smith is holding a 5x7 Press Single Lens Reflex Graflex from 1915. The cameras displayed dated from 1800 to 1966. Caution in choosing banks

"The bank you are banking with may not be the bank you think you are banking with. The Manufacturers Hanover Trust Company of Montreal is not the Manufacturers Hanover Trust Company of New York," warns Paul Tuz, President of the Better Business Bureau.

In certain countries, notably in the West Indies banking regulations are not strict. "Shell banks" and "offshore shell banks" that originate in another country and have international branches are incorporated without capitalizing their ventures and advertise for clients. These banks offer investment rates substantially better than their domestic and foreign competitors.

The presence of over fifty foreign banks in Canada provides business with reciprocity and competition in our banking system. "Canadians equate the term 'bank' with security; however the wider range of foreign

banking options in the last two years may sometimes lead to disastrous results. The investment risks may outweigh the returns", states Tuz.

Tire buying pointers

Don't gamble on bare-foot tires, warns Paul Tuz, President of the Better Business Bureau. And don't gamble on tires that are not made for your automobiles.

You can save plenty by shopping different retailers for car tires. Yet, there are so many types and grades - many with only slight variations from others - that it is difficult to compare them. That's why it is important to buy from a reputable dealer whom you can trust, Tuz points out.

Your shopping guidelines should include the brand and type of tire you want, backed by comparing prices among several reputable dealers. Prices for the same product can vary greatly. Also find out if the tires have to be balanced (most do) and how much this costs.

You have three basic types of tire construction from which to choose. Radial tires have cords that run directly across

the tire from the points where the tire touches the rim of the wheel. Radials also have belt plies under the tread to reinforce the tire.
