

# HAND at Dismantle meeting

**Herald Special**  
Last weekend Eldon and Betty Comfort of Acton and Linda Bobor of Georgetown attended Operation Dismantle's annual conference on Nuclear Disarmament at Ottawa University. Mr. Comfort and Mrs. Bobor are members of Halton Hills' new Action for Nuclear Disarmament group "HAND", and were active in last year's "Vote Yes for Disarmament" referendum campaign, which was begun by Operation Dismantle.

The Comforts combined their attendance at the Operation Dismantle conference with a visit to their daughter and family in North Gower, and Linda stayed with a billet in Gloucester.

People attended from across Canada and as far away as Australia. One man walked from Vancouver to the conference to demonstrate his commitment to the cause. Over 300 people attended the sessions on Friday evening and Saturday, and 500 attended the Saturday evening banquet. Noted speakers and panelists included such internationally known figures as James Stark (founder of Operation Dismantle), Tom Gervais

(former counter-intelligence officer and author), Mike Zendryczyk (Director of Disarmament and co-ordinator of the Nuclear Weapons Facilities Project), and Canadian-born actress Margot Kidder.

The highlight of the convention was the address by Dr. Helen Caldicott, president of Physicians for Social Responsibility, author

of "Nuclear Madness, What Can You Do?"

## Kiss an old flame goodbye.

We'd like you to take a minute now to think about something you'd really rather not think about. Home heating. Because right now is the perfect time to do something about next winter's oil bills.

If your oil furnace is in good condition, but you'd like it to run more economically, electricity is the answer. A dual-energy system combining oil and electricity will heat your home efficiently and economically.

For example, adding an electric plenum heater to your oil furnace will reduce the amount of oil you use by up to 75 per cent. While adding a heat pump will not only cut heating bills by 20 to 30 per cent, but also provide air conditioning in the summer, for efficient year-round comfort.

If your furnace does need replacing, an electric furnace or one of the other electric systems can heat your home cleanly, efficiently and economically.

Like to know more? Take a minute now and write to Ontario Hydro, Room U7 E1, 700 University Avenue, Toronto M5G 1X6 and ask for our free booklet "Electric Heating Options for Your Home."

Because the minute you take now could add up to big savings come December.

## IF YOU DON'T REMEMBER YOU MAY NEVER FORGET.

There are some very good reasons to stop for stationary school buses. Such as the penalties for not stopping, which could include six demerit points, fines of up to \$1,000 and even imprisonment.

But the most important reason of all is simply this: Your mistake could cost a child's life. And that kind of mistake is never forgotten.

So remember, drivers going in both directions must stop for a school bus flashing its red lights. And

drivers approaching from behind must stop at least 20 metres (about 4 car lengths) behind the bus.

And this year, there's something new to watch for. Every school bus in Ontario is now equipped with a STOP SIGN ARM that is automatically raised when children are getting on or off a school bus.

So keep an eye out this fall for flashing lights and stop signs on school buses. Please, don't take a chance with the life of a child.

## CAN YOU AFFORD TO FORGET?
