

Here Len Tuitman is pictured as he thinks a lot of his customers might remember him by: his beard, his pipe, and his wooden shoes. (Herald photo)

## Tuitman plants usher in spring

By ROBIN BAKWELL  
Herald Staff

There are plants that will do well in Florida which will not do well here, and there are plants that will do well in Oakville that might not do so well in Milton.

This information comes from Len Tuitman who, with his wife Elly, operates Tuitman's Garden Centre and Landscaping.

Planting areas are divided into zones with the difference being about one zone, between Oakville and Milton. "Milton is cooler and has a little later summer," Mr. Tuitman said.

While working as an accountant in Holland, Len Tuitman decided he needed a change. After immigrating to Canada in 1970 he worked briefly with the City of Mississauga Parks Department and has now been involved in gardening and landscaping for twelve years.

**WOODEN SHOES**  
"They may not know my name but they might recognize me by my wooden shoes and beard," he said.

Tuitman's Garden Centre and Landscaping is located on Highway 25 just south of Acton. The 40 acre site has about 150 varieties of plants ranging from fruit trees

to rose bushes. The Tuitmans will not only provide the plants for a garden but, if the customers asks, the actual design. "A garden may be easy or intensive, depending on how much time they (the customers) want to spend on it," stated Mr. Tuitman.

"A nice garden will add to the beauty, and the retail value of a house."

**EYE-CATCHING**  
One new trend in gardening which the Tuitmans provide, is a special process the nurseries use called grafting. Plants that would normally grow into shrubs are grafted onto long stems which gives them an "eye-catching", tree-like effect.

The Tuitmans cite late April and early May as their busiest time of the year. "A lot of people still think that you can only plant in Spring or Fall, all our plants are potted up, and you can plant them on the hottest day in July," explained Mr. Tuitman.

"People tend to over-water their plants and end up drowning them." The only problem the Tuitmans can see with the plants they provide, is the periodical weeding of the garden.

**Heat Resources**  
Scientists at the University of California, Lawrence Berkeley Laboratory have developed an instrument capable of delving into boiling brine

more than 2 1/4 miles beneath the earth's surface to measure fluid flow in geothermal reservoirs. Geothermal energy—heat from deep within the earth

manifested as steam and hot water—can be tapped to drive the turbines which power electrical generators and is a potentially valuable resource in many regions of the world.

**SICK LIST:** Georgetown-Hospital - George Mitchell, H. Doane and Doris Frawley.

### Ladies urged to vote

By LIZ McNEILLY  
Herald Special  
We had a very poor turnout at our last General Meeting and I hope to see the Hall filled next month as this will be our elections and it is up to every Auxiliary member to come out and vote. April 28 is Zone fun day in Streetsville, tickets are \$2 each and may be obtained from Lorna Postleth-

waite. April 30 we will host the Zone Convention and this should be a very impressive evening, the meeting will start at 7:30 p.m.

A very special thank you to Jean Roslier for her help in entertaining us musically at our Spring Social. Good luck to our team of bowlers going to Timmins this weekend.
