TRIVIA

Important Plankton

Euphausia superba, a protein-rich crustacean that may be the world's most important plankton species, has 11 pairs of legs. It swims with the five back pairs and feeds with the six forward pairs.

Canned Foods

Frost-bitten vegetables may be canned, but put them up as soon as possible after the frost hits. It is not safe to can strained (pureed) vegetables or meats at home. Instead, can them in the usual way and strain them just before serving. Try to use home canned foods within a year. They will remain safe for several years longer, but the eating quality will drop.
