"Trigger" in Cell Division Identified

A zoologist at the University of California, Davis has identified what may be the mechanism triggering the start of development in fertilized frog eggs. Much the same mechanism may also play a role in human development and also in cancer.

That Sinking Feeling

London is sinking. So are Tokyo, Bangkok, Shanghai, Houston, New Orleans, and even landlocked Mexico City and Las Vegas.

More than a dozen of the world's great cities are slowly sinking into the lands on which they were built, some at worrisome rates, dropping as much as a foot a year.

Most are sagging not under their own weight, but because so much ground water has been pumped out from under them.
