

Georgetown Tire

The owner is close by to handle your car problems

Finding a trustworthy person to take care of your car troubles can be a worry. There are so many different shops that specialize in so many different problems, that finding good people at each seems an insurmountable task.

The answer to these worries is at Georgetown Tire Sales, Halton Muffler at 345 Guelph St. at Armstrong Avenue in Georgetown.

"Anything to do with the ride of the car we pretty well have," said Randy Courneya, owner of

Georgetown Tire Sales, Halton Muffler.

Mr. Courneya has been the owner since February when he combined Georgetown Tire Sales and the Thruway Muffler Centre. The combined shop handles problems with tires, exhaust systems, springs, shocks, alignment and radiators.

The people handling your car are the "best I could find," Mr. Courneya said. "My radiator man is top notch. He can fix anything from a heater core on a Honda Civic to a bolt-on rad for a Mack Truck."

A shop with an owner on site makes a difference to quality; you can't go any higher than the owner with a problem, and "I'm always here," he said.

The Georgetown Tire emergency crew are on duty 24 hours a day, seven days a week. The two service trucks are ready at all times to fix any tire problem.

Nobody in Georgetown sells more types of tires, Mr. Courneya said. They sell tires for cars, light trucks, medium trucks, farm machinery and industrial machines.

Goodyear, Michelin and Dayton are the brands available. AP Canada Mufflers (Thruway) are the mufflers carried.

Business has been excellent, Mr. Courneya said. The business sees many repeat customers come in with different car troubles at the "one stop service centre," he said.

Halton Thruway Muffler Centre staff are always eager to help you with your muffler problems. But that's not all they do. If you have radiator problems with your car, or

your car needs new shocks, come to Thruway Muffler. Seen here are (left) John Harrison, the muffler service specialist and Terry King, the radiator specialist. (Herald photo)

Fuel formulas save on maint. costs

Using gasoline additives has always been a matter of faith rather than certainty — we pour the additives in and hope that all runs smoothly! But now there is a proven way to eliminate the guesswork and save on costly maintenance as well.

The Quantum System of fuel formulas is designed to match the correct product with the specific problem that needs to be prevented or corrected, allowing for a much more concentrated and powerful performance than would otherwise be available.

- Quantum FP, to solve the problems of poor performance due to clogged fuel injectors with one simple treatment;

- Quantum OI, to improve octane, thereby stopping "knocks" and "pings" and increasing power;

- Quantum VS, to prevent valve wear-down in cars designed for leaded gasoline but now unable to get gasoline with enough lead;

- Quantum VS + OI, which combines two Quantum formulas, to replace lead as a valve wear-preventer and as an octane improver.

"Leasing All Makes"

I can put you behind the wheel of any car or truck you want! From Ponys to Porsches.
