

Part of Georgetown &
Area for over

30 *years*

From our modest beginning in Georgetown over 30 years ago, Varian Canada has grown steadily. We employ more than 400 people half of whom live in Halton Hills. We produce and sell over \$40 million annually in high technology products used around the world. These specialized products are manufactured by no other Canadian company. They include:

- TRAVELLING WAVE TUBES
- MILLIMETER KLYSTRONS
- MICROWAVE TUBES
- SPECIALIZED POWER SUPPLIERS

The employees who make up Varian Canada are engaged either in manufacturing, sales and service, or in the development of our unique products which makes us world leaders in tube technology.
