VARIAN SALUT

Alan Elbanhawy lifts a few weights on his lunch hour while Health and Safety Administrator Janice Kron looks on. Varian heavily emphasizes the health of its employees.

Ralph Borchman works for the power supply department inspecting circuit board cables and power supplies. Ralph has worked for Varian for the past two years and he is one of two inspectors in the power supply department.

Gary Spiller (right) and Jim Fallow have offices side by side and it's no wonder. The two employees must work closely together to make sure the product they're working on is of top calibre. Gary is the Production Engineering Manager and Jim is the Production Manager, for Travelling Wave Tubes.
