North Halton ladies tee off for season

North Halion Ladies opened their 1987 season under sunny skles on Tuesday, May 5 at the North Halton Golf and Country Club.

Eighty-four members played scramble golf and later enjoyed a buffet dinner. President Kathryn Latimer gave a world of welcome and introduced several new members. Captain Carole Carter awarded the prizes to the winning

First Low Gross Winners - Vi Cochrane, Hazel Arnold, Vera Mays and Lyn Willy.

First Low Net Winners - Marilyn Medlock, Jane Douglas and

Madeline Collier. Second Low Net Winners - Gail Finlayson, Joan Baker, Katle

Hedley and Joan Nagel. Third Low Net Winners - Peggy Darmody, Dorothy Hicks, Velda Carlo and Yoland Paul.

Fourth Low Net Winners - Phyl Moncton, Gail Collet, Pat Harris and Kathy Mays. Fifth Low Net Winners - Eleanor

Inglis, Marion Burns, Kay Gow and Ann Livingston. After a short business meeting. the day ended with Pro John Henderson showing a video on the

Kulwicki joins field

rules of golf.

Kulwicki, who is being touted as him a coming superstar. stock car racing's next superstar, will race in the \$90,000 Molson Export 200, June 6-7, at Cayuga Speed-

Kulwicki, who still holds the track record on Cayuga's 5-8ths-mile oval, is currently negotiating for a car to race in the Molson Export 200, third event in the nine-car American Speed Association (ASA) series.

A former ASA regular, the 32-year-old Kulwicki has no illusions about breezing to victory against his former opponents.

Kulwicki, known as 'Special K' in his ASA racing days, won the NASCAR rookie-of-the-year award, despite racing with an underfinanced team and with only two crew members. His best finish was

fourth at Bristol Speedway.

This season, he has already scored another fourth-place finish, won a pole position and is consistently running in the top 10, driving a Ford Thunderbird.

NASCAR rookie-of-the-year Alan The experts are already tagging

At the Molson Export 200, Kulwicki will not only be going for a victory and a share of \$90,000, but he will be defending his own track

He set the mark in qualifying for the 1985 Melson 27, lapping the 5-8ths-mile banked oval in 19,409 seconds, 115.926 mph, in his Hardee's Ford Thunderbird.

HAZARDOUS WASTES This is the time of year that most

woods, streams and lakes. Unfortunately, many of these places earth with sinks of toxic waste. now carry scars inflicted by human carelessness. Man is the only species which routinely fouls its own nest. Along favorite streams, pipes discharge malodorous liquids; olly orange runoff oozes from places along the bank. Lakes are choking in algae, its growth encouraged by the life.

Even wells may be unusable because the ground water has been contaminated by the continuing use of chemical herbicides and pesticides. People's personal habits may be contributing to the problem.

How many routinely dump caustic household cleaners and solvents down the drain, or throw unused chemical sprays into the garbage.

The Federation of Ontario Naturalists has tackled the problem of hazardous wastes in a 30 minute documentary which will get its first television showing on Sunday, May

Dr. Chant, toxicologist, and Chairman of the Ontario Waste Management Corporation, tell viewers that if man continues on the present course, it is only a matter of time before serious health problems, related to continued exposure to toxic chemicals, develop in human be-

But this is not the inevitable course of events. There are solu-

Waterloo, because of its tough environmental laws, has forced companies to look at sensible ways of cleaning up.

The film takes a look at Len Raucher's electro-plating plant, which is no longer producing the large quantities of toxic substances common to the business. He is purifying his rinse water, recycling what he can and treating unrecoverable wastes. He says that being forced to clean up has made his operation more efficient.

Yes, the problem has a solution; the technology is there. With a forceful appeal to everyone to inform people about the problem in their area and some concrete suggestions about what might be done, the producer ends the film on a strong and positive note.

It's a film people can't afford to miss.

The film can be obtained for a \$25 rental fee or \$50 purchase price from The Federation of Ontario Naturalists, 355 Lesmill Road, Don
