

Don't miss 'My Favorite Kitchen'

Visitors to the all new Toronto Home Improvement Show will be treated to a fascinating kitchen feature, presented by Jim Hazzard. Mr. Hazzard, who is one of a handful of professionals who have earned the designation C.K.D. (Certified Kitchen Designer), will display "My Favourite Kitchen" at the Show, to be held at the Automotive Building, Exhibition Place, October 15 to 18.

Located on the Mezzanine Level, the kitchen will indeed be Jim's "favourite" - high gloss white with yellow trim, fitted with labour saving devices and organizational aids to save time and space, including the latest in high tech appliances from North American and European manufacturers. The entire kitchen is brought to the Show by Heartwood Kitchens of Toronto, whose showroom and design centre has been a Toronto mainstay for the past decade. The cabinets and fittings have been manufactured by Heyme Wood Products of Amherstburg, Ontario,

who have gained an international reputation.

Visitors who bring their own kitchen plans to the Show will be furnished with an area where Jim and an associate designer will assist visitors in their planning and design. In addition to the time he spends consulting in "My Favourite Kitchen", Jim Hazzard will speak four times a day, in the Ministry of Housing Theatre on the Exhibit Floor. Once again, Show visitors will be encouraged to come prepared with pencil and paper as Jim lectures on kitchen/bathroom design and products.

The Toronto Home Improvement Show hours of operation are: Thursday, October 15 - 1 p.m. - 10 p.m.; Friday, October 16 - 1 p.m. - 10 p.m.; Saturday, October 17 - 10 a.m. - 10 p.m.; Sunday, October 18 - 10 a.m. - 6 p.m.

Admission to the Show is \$5 for adults, \$3 for seniors and \$3 for children eight to fourteen years of age. Children under eight are admitted free, when accompanied by an adult.

Something for all at show

There will be something for everyone at the all new Toronto Home Improvement Show, at the Automotive Building, Exhibition Place, October 15 to 18. Visitors will have the opportunity to see the latest in home renovation ideas and services - many designed to inspire the do-it-yourself during the long winter months and others intended to satisfy those who just want to while away their time until Spring.

The do-it-yourself around the house will enjoy a demonstration of The Jaws Ladder, voted Best New Canadian Product of 1987 by the Canadian Hardware and Housewares Manufacturers Association. The Jaws Ladder is five stepladders rolled into one and literally fits into the trunk of a car.

At the end of a winter day, people love to relax in a sauna - now Health Mate has a sauna that assembles in minutes, runs on 110 volts, heats up in 15 minutes and has a revolutionary infrared ray heating system.

Thorsystem Products will demonstrate its new line of "U Do It" products. The do-it-yourselfer has long been waiting for this product line to arrive. U-Plug, for example, is a fast setting hydraulic cement for stopping active water leaks and can be used above or below grade, indoors or out. U-Plug dries in three to five minutes, expands as it hardens and locks into the wall to seal out water. This product can be used to stop water leaks in concrete and masonry walls, basements and swimming pools and to

seal cracks in concrete and masonry.

In response to controversy about clean drinking water, Nibus Systems will display their Reverse Osmosis Travel Companion, for visitors who want clean, fresh water away from home.

The Do-It-Yourself Centre will be one of the Show's star attractions. No large intimidating crowds here; visitors can receive advice from experts in an intimate, friendly atmosphere, where one-on-one communication is encouraged. Armed with only pen and paper, both the beginner and the expert can acquire knowledge that will carry them successfully through those winter projects. This feature is sponsored by Lumberking and demonstrations are carried out by representatives from ten major companies. Among others, visitors can learn how to install ceiling tiles and roof shingles from Building Products of Canada; the proper use of hand tools by Sandvik; techniques of refinishing wood furniture by Tremco; and Premdor will explain the intricacies of door installations.

This is just a sample of the products and services available from approximately 200 exhibitors who will occupy more than 450 booths at the Toronto Home Improvement Show. Under one roof visitors will view all the latest professional and do-it-yourself renovation products and services. Interior decoration ideas will be highlighted, along with garden and interior planting products.

REAL ESTATE IN GEORGETOWN

In the 1820's, George Kennedy, a licensed land surveyor, bought 200 acres of land from the crown, and farmed it. Two other families, the "Goodenows" and the "Sylvesters" also came to the area and the community of 15 people became known as "hungry Hollow". Kennedy built a Grist Mill to process his grain and that of neighbouring farmers. This enterprise was so successful that other mills followed. In 1837, the Barber brothers started "Barber Wollen Mill" in Hungry Hollow and eventually built several other mills including a paper mill. Thus Georgetown was established.

Your comments are invited. Please phone or write to us. We would be particularly interested in hearing from developers (future or past) - or present!
