

A Welcome Addition

The ground turning for Dominion Seed House's new Country Garden Centre was held last spring, and the retail outlet opened in the fall. Digging in with the shovel are, from left, Dominion general manager Doug Peck, Agriculture Minister John Wise, and local MP John McDermid.

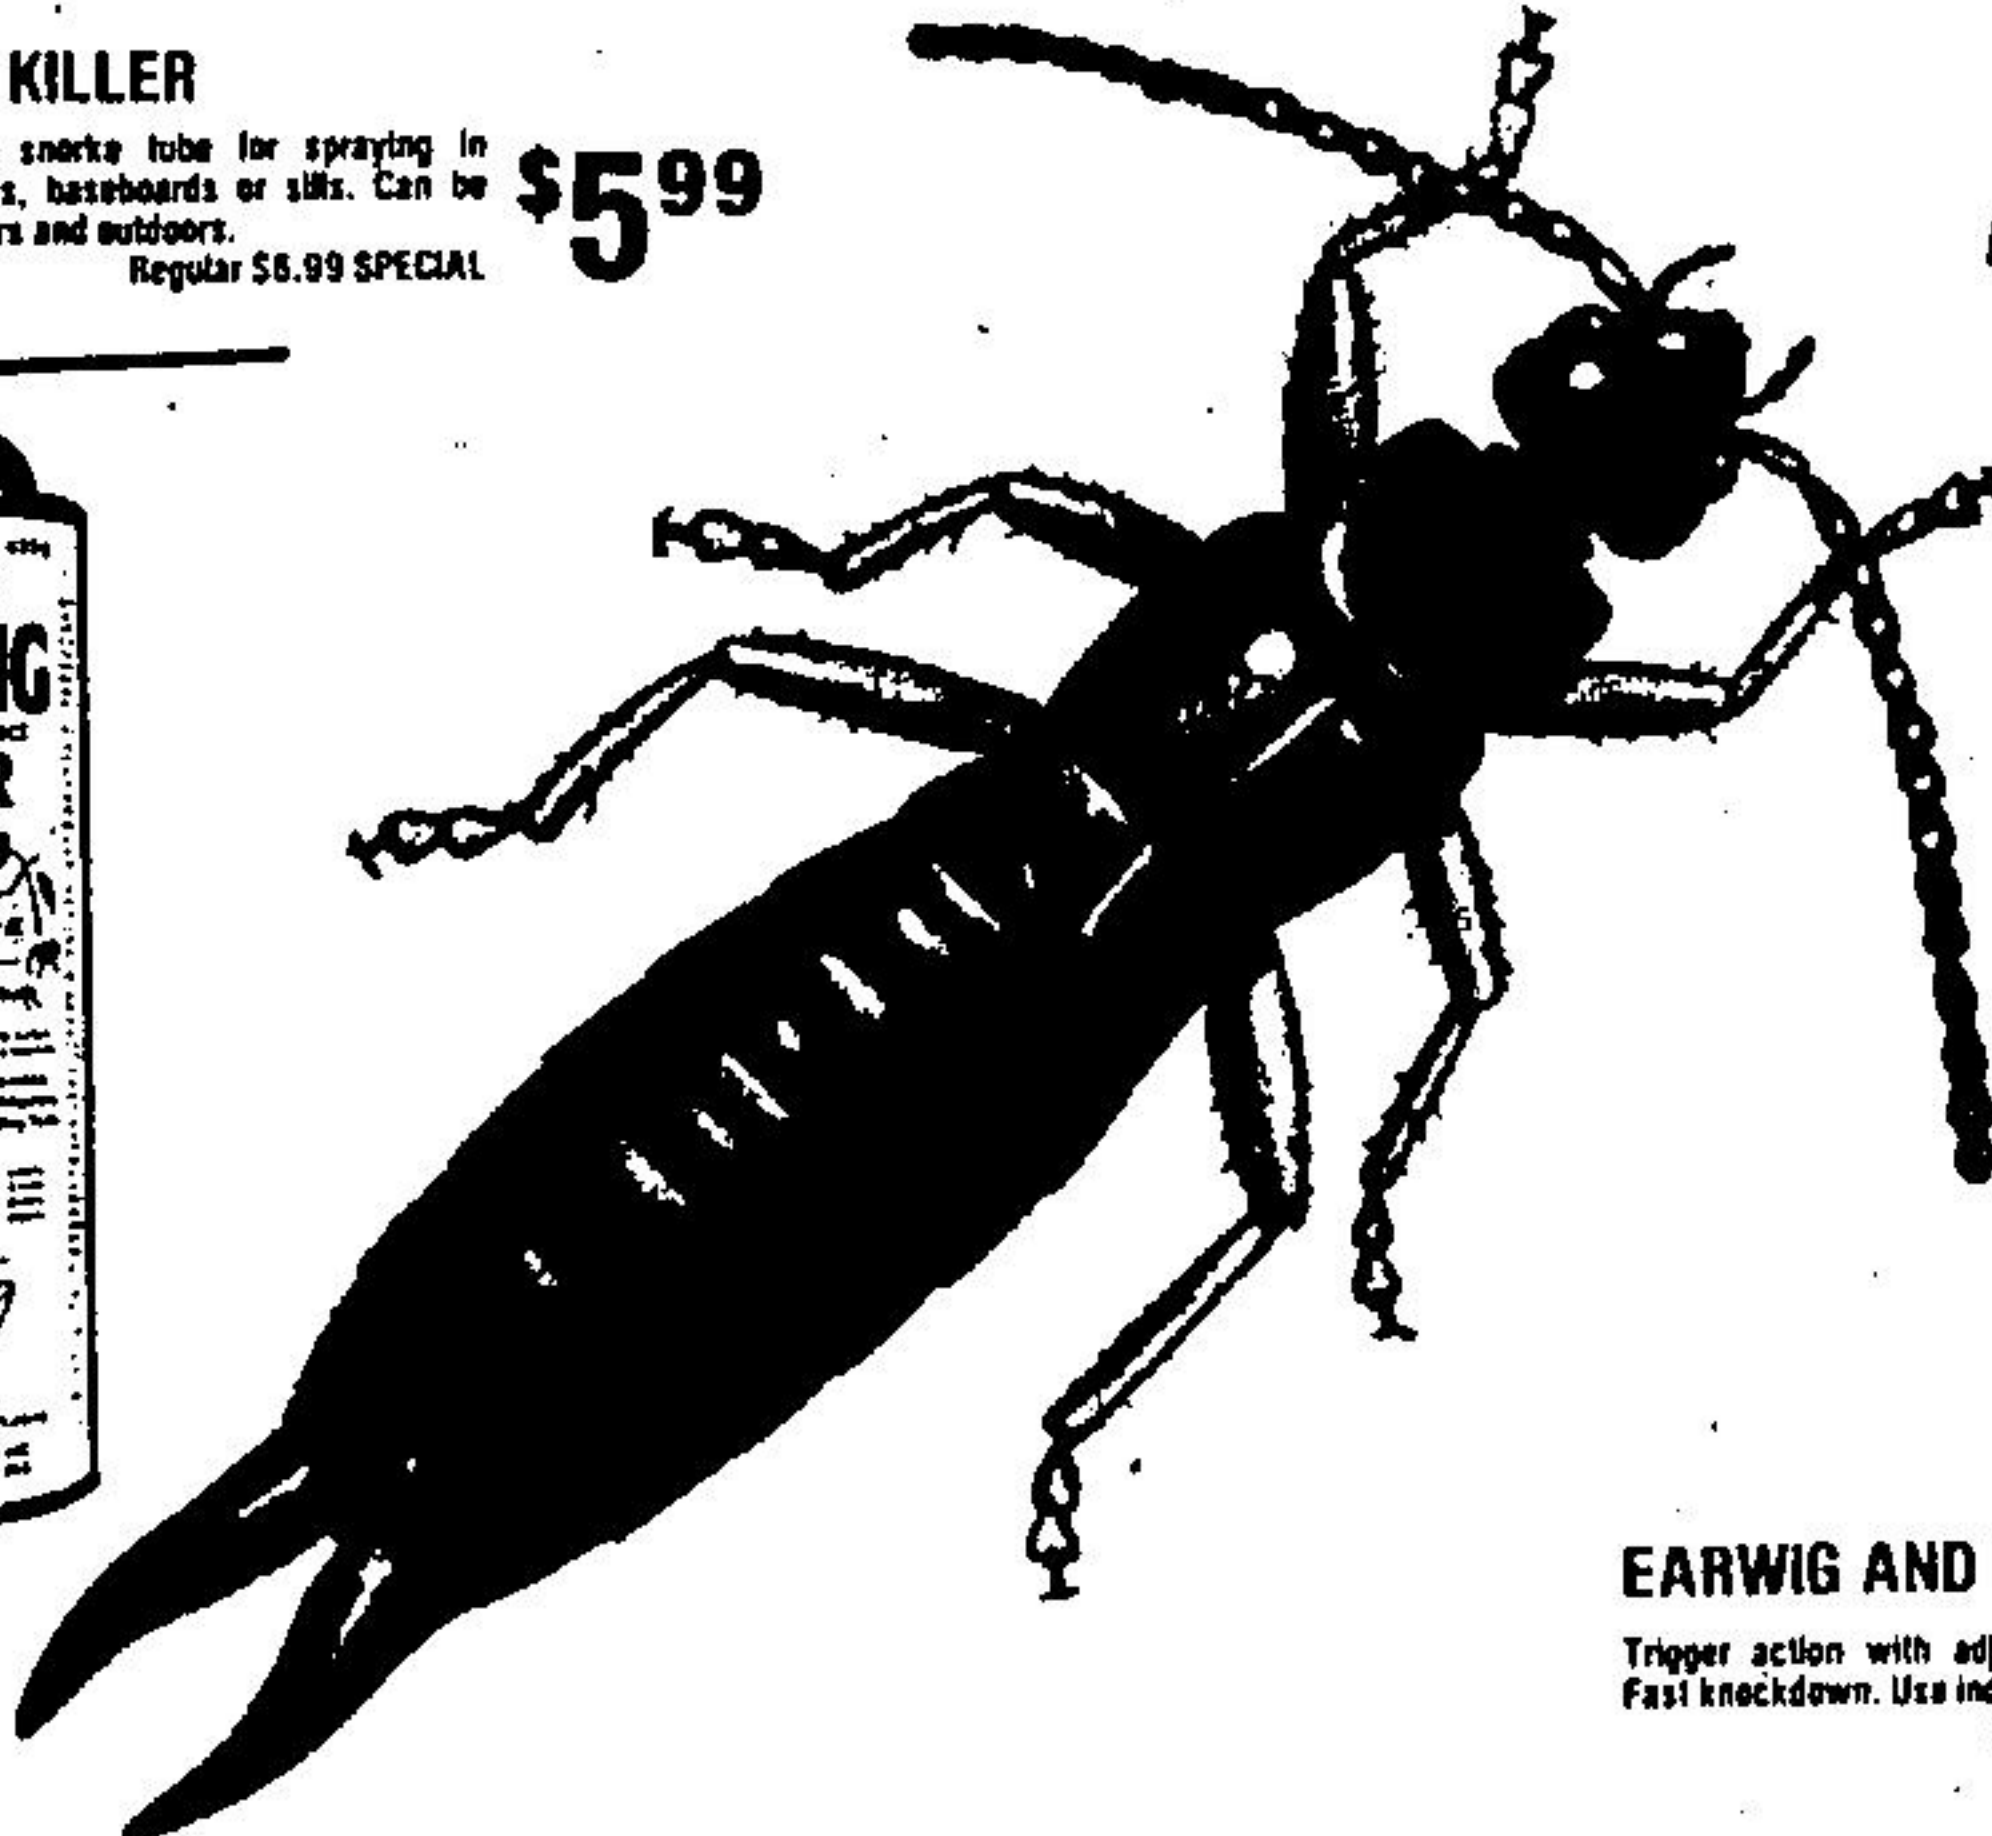

The opening of Dominion Seed House's Country Garden Centre last year gave the business an important link with the community. All the seeds and products handled through their mail order business are now available at their retail outlet.
