

THE OUTLOOK CLASSIFIED & REAL ESTATE

TRIVIA

Population Boom

The world's human population reached its first billion in the early 19th century, but it doubled and reached 2 billion by 1930. By 1975 it had doubled again. In the remaining years of this century world population will top 6 billion; by 2025 it will reach 8 billion, says National Geographic.

Space Fireworks
Scientists at Los Alamos National Laboratory are planning five spectacular space-based experiments that promise to light up parts of the Earth's atmosphere with a series of physics paintings. The experiments, recently approved by NASA, will be carried out with the help of the Space Shuttle, a vast network of sophisticated monitoring devices and a special satellite now under construction.

Tuned Laser

Physicists at the University of California, Santa Barbara have announced successful development of the first powerful, tunable laser to operate in the far-infrared region of the light spectrum.

By permitting broad study of the far-infrared region, the laser opens a "genuinely new frontier where there are basic problems in physics and chemistry that, until now, have been beyond reach."

Pickle Spoilage

Signs of spoilage in home-canned pickles are: spurting liquid, mold, foul odor, mushiness, slipperiness, cloudiness, bulging lid and loss of seal.
