Dear Voter:

Monday, November 14th is MUNICIPAL Election Day in Halton Hills.

You, the resident and taxpayer, will have an opportunity to direct the future of your neighbourhood.

It is your vote that will determine whether our roads improve, whether our greenspace is protected, and we "stop the dump". It is your vote that will determine how we grow and how we meet our employment and economic needs.

I encourage your participation and respectfully ask for your support.

Sincerely,

Pam Sheldon ...

A "leader" for MAYOR

WATCHING YOUR TAX DOLLARS

"Fiscal responsibility means realistic, affordable approaches to providing you with acceptable Levels of Service."
To decrease property tax pressures we must ensure and increased industrial/residential ratio and better cost-sharing relationships with other levels of government.

PLANNING FOR HOUSING NEEDS

Without affordable housing our young people can't afford to stay in Town and our industries can't afford to house their workers.
We need a Leader who has the vision to anticipate the long-term needs of this community and the ability to make housing plans work for you.

STOP THE DUMP!

"Pam Sheldon was the first person on Council to openly oppose the "dump" in Acton. She spoke on behalf of her constituents long before it became a popular issue. She has the know-how and the determination to successfully represent us ... the environment has a friend in Pam Sheldon."

Marjorie & Harvey Kirkwood, Acton
"She has our vote"

TRANSIT - AN ISSUE FOR THE FUTURE

A local transit system - an issue of the future - should be planned for today.
With growth, and an aging population that must have mobility, transit planning must be an item on Council's agenda following the November 14th election.

SENIORS

"To keep the frail and elderly in their homes, Pam Sheldon supported increased assistance to Halton Helping Hands. To provide for active seniors, Pam Sheldon had the foresight to insist that land be set aside for a seniors facility, and she recognizes the future need for a transit service to ensure mobility in our Town."
Kay Braiden, Georgetown

AGRICULTURE vs "BIG PIPE"

Russ Miller says ...
"...it is essential to develop the Hwy. 401 Corridor; even if it means bringing in water from Lake Ontario."
"However, the pipeline would likely spell the end of much of the best agriculture land in Halton Hills."
(excerpt The Herald)

Pam Sheldon says ...
"...such a trade-off can be avoided. "I don't agree with that approach in black and white."
"You don't accept a pipeline from Lake Ontario without exhausting all the other alternatives. I have a vision of Halton Hills as a mecca surrounded by the Golden Horseshoe cement. If we bring that pipe up today in 10 years you won't know Halton Hills."

IMPROVED ROADS A MUST

For years we have heard talk and promises about road improvements; of getting the aggregate industry and the Province to help pay for better roads ... but serious negotiation has never happened.
I am both prepared and committed to resolving this problem ... once and for all.

**IT'S YOUR TOWN.... Take Care of it!
On November 14th, 1988 VOTE**

If you are not on the current voters list, you can be sworn in at the Polls!

For Transportation to the Polls Call:
