Young Outlook

A snake has an exceptionally keen sense of smell made possible by its tongue and Jacobson's organ. This organ picks up dust particles from the snake's tongue which has pulled them in from the air. The Jacobson's organ is very sensitive to odors and allows the snake to follow the scent trail of its prey.

Some kinds of snakes have completely almost destroyed. This should not be allowed to happen since snakes, like all creatures, are important to the balance of nature.

The autumn months are great for spending more time outdoors. The weather is cooler and it's fun to watch the changes around you. How many leaves that are different colors can you find on the trees in your town?

BOOKS

Under the Ocean by Eugene Booth. Grs. K-3. Bright, funny illustrations and word games show interesting things that happen "under the ocean."

At Last to the Ocean by Joel Rothman. Grs. 1-3. The endless cycle of water is explained with simple terms and photos.

It is estimated that millions of trees are accidentally planted by squirrels who bury nuts and then forget where they are hidden.

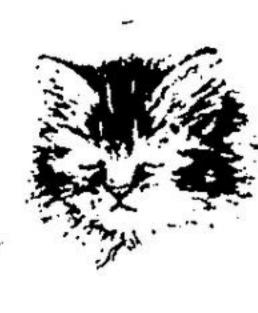

The seasons in the Southern Hemisphere of the Earth are the the Northern Hemisphere. The first day of autumn in the Northern Hemisphere is the first day of spring in the Southern Hemisphere.

A large oak has about 250,000leaves, but a cypress may have some 40-50 million leaf scales.

Cat 7un

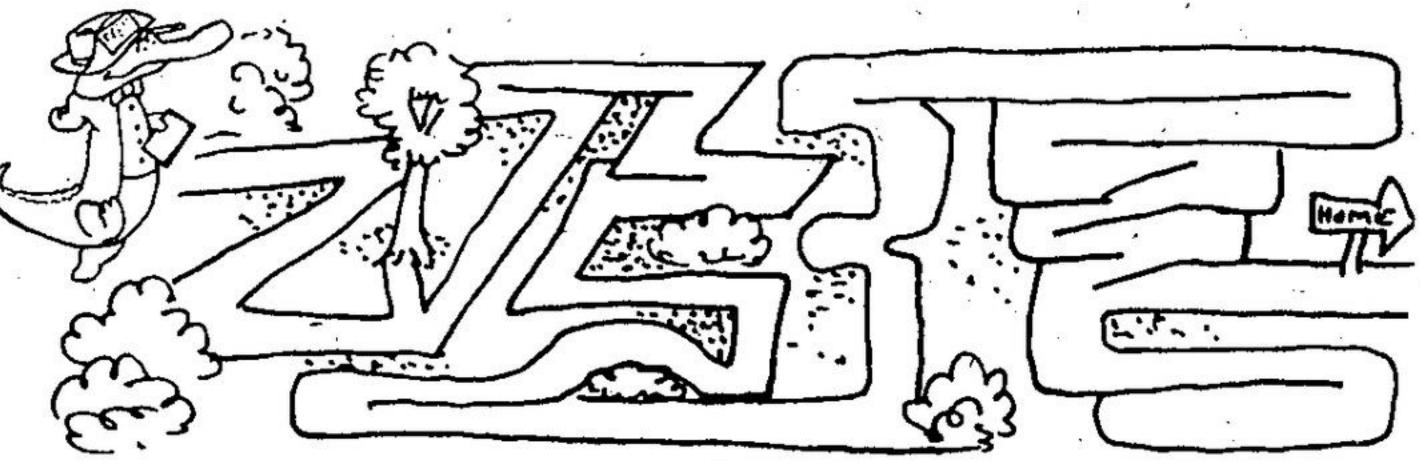

As almost everyone knows, cats are playful and can be lots of fun. In the word-ladder below, change the word Rocky the Cat by A.R. "cat" to "fun" in only two steps. At each step you are Swinerton. Grs. 4-5. Bryan's allowed to change only one letter in the word which comes just before.

Answers: cat, fat, fan, tun
